## Documents Pertaining to Winter Flounder

By electronic mail on Thursday, April 15, 2004, you requested copies of the following two documents:

**Dimou, N.K. and Adams, E.E. 1989. "Application of a 2-D particle tracking model to simulate entrainment of winter flounder larvae at the Millstone Nuclear Power Station." Energy Laboratory Report No. MIT-EL 89-002. Massachusetts Institute of Technology, Cambridge MA.**

**NEFSC (Northeast Fisheries Science Center). 1998. " Status of the fishery resources off the Northeastern United States for 1998." NOAA Technical Memorandum NMFS-NE-115, 1-149.**

Enclosed please find copies of these two documents. Also, please be advised that a NOAA document which contains more current information than the Technical Memorandum can be obtained at the following link:

<http://www.nefsc.noaa.gov/nefsc/publications/crd/crd0306>

Once there, click on the link for the Southern New England/Mid Atlantic stock of winter flounder - Section B1.

For convenience, I will also send this link to you electronically. A copy of this package is being sent to Ted Doerr at Los Alamos National Laboratory.

Should you have any questions regarding this submittal or any other matter, please contact me at 860-447-1791, extension 3876.

Cc: Mr. Ted Doerr  
Los Alamos National Laboratory  
Mail Stop J591  
Bikini Atoll Road SM30  
Los Alamos, NM 87545

Enclosure:

1. Dimou, N.K. and Adams, E.E. 1989. "Application of a 2-D particle tracking model to simulate entrainment of winter flounder larvae at the Millstone Nuclear Power Station." Energy Laboratory Report No. MIT-EL 89-002. Massachusetts Institute of Technology, Cambridge MA.
2. NEFSC (Northeast Fisheries Science Center). 1998. " Status of the fishery resources off the Northeastern United States for 1998." NOAA Technical Memorandum NMFS-NE-115, 1-149.
