Bradley M. Campbell
Commissioner

March 29, 2004

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, DC 20555-0001

Ladies and Gentlemen:

Subject: Oyster Creek Generating Station
Docket No. 50-219
License Amendment Request No. 306

AmerGen Energy Company, LLC submitted the subject change request to the Nuclear Regulatory Commission (NRC) on April 21, 2003 with a supplement submitted September 11, 2003. The proposed changes would revise Technical Specifications and associated Surveillance Requirements pertaining to certain direct current (DC) power sources (B and C station batteries and associated chargers). In addition, a new administrative controls section pertaining to a station battery monitoring and maintenance program is proposed.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering reviewed the request in accordance with the requirements of 10 CFR 50.91(b). We have no comments.

If you have any questions, please contact Jerry Humphreys at (609) 984-7469.

Sincerely,

Kent Tosch
Manager
