Subject: Re: IAEA GRAPHITE DATABASE

^{CIO} The Technical Library has added a link to the information on the IAEA graphite database to our main homepage. As more announcements are put on the main library homepage, the link for the IAEA graphite database will move down, and eventually onto the archive of "What's New" page.

If you wish, we can also put it under the category of "web resources" and this will ensure permanent access. Once Internet access is established, we will put it on the databases page. Let us know if you have any suggestions.

>>> Raji Tripathi 11/05/2001 8:41:03 AM >>>

^{RES} It would be most useful to have a direct link set up to the IAEA Graphite Database. The url is:
[http://www-amdis.iaea.org/graphite.htm!](http://www-amdis.iaea.org/graphite.htm)

I would very much appreciate your help in setting up a link between the Technical Library on the NRC internal web to this page. Pl. let me know of the completion so that the Advance Reactor Group in RES and the New Reactor Licensing Project Office in NRR can be informed to derive the maximum benefit.

Thanks, Raji (415-7472)
