**Subject:** ACTION: SECY PAPER FOR NRR CONCURRENCE *-NRR* *rel. xrr*

To all:

The attached SECY paper was prepared by RES to inform the Commission of potential policy issues related to licensing non-LWR reactor designs. These issues include: defense-in-depth; event selection and classification; licensing source term; containment/confinement; emergency preparedness; expectations for safety; and international safety requirements.

A draft version of this paper was circulated for NRR comments on May 30, 2002 and comments were provided to RES (attached for background). RES has now requested NRR concurrence on this paper. **Please review and provide comments to Amy Cabbage (415-2874 or AEC) by June 25, 2002.** TAC MB0569 should be used for this effort.

Thanks,  
Amy
