Subject: Response to Regulatory Issue Summary 2001-17, "Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary 2001-17, "Preparation and Scheduling of Operator Licensing Examinations," dated August 22, 2001

This letter provides our voluntary response to the request for information contained in the referenced Regulatory Issue Summary (RIS). The NRC requested that a voluntary response to the RIS be submitted within 30 days of receipt of the RIS. We received RIS 2001-17 on August 22, 2001; accordingly, we are submitting our response by September 21, 2001.

SEP 26 2001

As requested, Attachment A, "Completed NRC Form 536," contains a separate NRC Form 536 [August 2000], "Operator Licensing Examination Data," for each of our Midwest Regional Operating Group facilities addressed by the RIS. The information provided for each facility includes: the proposed examination preparation schedule for calendar years (CYs) 2002 through 2005; the estimated number of applicants and proposed dates for each of the initial operator license examinations through CY 2005; and the estimated number of candidates that plan to take the Generic Fundamentals Examination in CYs 2002 and 2003.

If you have any questions or concerns regarding this information, please contact J. A. Bauer at (630) 657-2801.

Respectfully,

K. A. Ainger
Director – Licensing
Mid-West Regional Operating Group

**OPERATOR LICENSING
EXAMINATION DATA**

Estimated burden per response to comply with this voluntary information collection request: 1 hour. This information collection is used to plan budgets and resources for operator examinations. Send comments regarding burden estimate to the Records Management Branch (T-6 E6) U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 or by internet e-mail to bjs1@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0131), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Mr. Oliver D. Kingsley, President
and Chief Nuclear Officer
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

Dear Mr. Kingsley:

In response to your facility management letter dated September 21, 2001, and as augmented by discussions with Thomas Shortel of your staff on January 28, 2002, we have tentatively scheduled an initial licensing examination for your operator license applicants at the Clinton Power Station during the weeks of January 5 and January 12, 2004. Validation of the examination will occur at the station during the week of December 15, 2003. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

As stated in your letter, your staff will develop the examination. To support the examination administration date, we have tentatively scheduled the date of November 24, 2003, to begin our review of your submitted examination.

Your letter indicated you are training approximately 11 candidates for the examination. Please inform us if the number of candidates declines below 10 as this will impact the examination schedule. Please also inform us at your earliest opportunity if you discover you are unable to support the examination on the scheduled dates.

Once your staff has determined a schedule for examination development, please have them contact the Chief Examiner to arrange for a suitable examination outline submittal date for NRC review. The intent is for the examination outline to be submitted early in the examination development process. This is to preclude the need to make significant changes to developed examination material as a result of the NRC review of the outline. Hironori Peterson has been tentatively assigned as the Chief Examiner and can be reached at 630-829-9707.

A supplementary letter will be sent to the training department approximately 120 days prior to the examination outlining examination security expectations, listing the materials required by the NRC to conduct the examination, reconfirming the examination dates, and reconfirming the number of candidates you have in the training program. If you have any questions concerning this information, please contact David Pelton of my staff at 630-829-9732.

ML020460230

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,

David E. Hills, Chief
Operations Branch

July 16, 2003

Mr. John L. Skolds, President
and Chief Nuclear Officer
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: CONFIRMATION OF INITIAL/REQUALIFICATION OPERATOR LICENSE
EXAMINATIONS: CLINTON POWER STATION

Dear Skolds:

In a letter dated July 18, 2002, (RS-02-123) your staff requested we schedule an initial license operator examination in January 2004 and in November 2004. In a subsequent telephone conversation on June 19, 2003, between Mr. D. McNeil of my staff and Mr. K. McCall, Clinton Station Operations Training Manager, the requested examinations were tentatively scheduled to occur during the weeks of January 5, 2004, and January 12, 2004. The second examination was tentatively scheduled to occur during the weeks of November 15, 2004, and November 22, 2004. On-site validation of the examination will occur at the station approximately 3 weeks before the examinations are administered. In the unlikely event that we are unable to support the examinations during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examinations at a mutually acceptable date.

As stated in your letter, your staff will develop the examinations. Mr. McCall indicated that you are training approximately 13 candidates for the January 2004 examination and 11 candidates for the November 2004 examination. Please inform us if the number of candidates declines below 10 for either examination as this will impact the examination schedule. Mr. McCall confirmed that the week of September 29, 2003, scheduled for the biennial requalification program inspection (IP 71111.11B), was still within the anticipated requalification examination administration cycle. Please inform us at your earliest opportunity if you discover you need to change the scheduled dates for either of the examinations.

A supplementary letter will be sent to the training department approximately 120 days prior to the initial examinations informing them of the chief examiner's name. The letter will also outline examination security expectations, list the materials required by the NRC to conduct the examination, reconfirm the examination dates, and reconfirm the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. B. Palagi of my staff at 630-829-9611.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
801 WARRENVILLE ROAD
LISLE, ILLINOIS 60532-4351

September 8, 2003

Mr. John L. Skolds, President
and Chief Nuclear Officer
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

Dear Mr. Skolds:

In a telephone conversation on September 5, 2003, between Mr. Hironori Peterson, of my staff, and Mr. Tom McCall, Operations Training Manager, arrangements were made for the administration of licensing examinations at the Clinton Power Station the weeks of January 5, 2004 and January 12, 2004. In addition, the NRC will make an examination validation visit to your facility the week of December 1, 2003.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 8, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

Your staff has already submitted the examination outline to Mr. Peterson, and feed back was provided to your staff on July 18, 2003. The written examinations, operating tests, and the supporting reference materials identified in Attachment 2 of ES-201 will be due by November 10, 2003. Pursuant to 10 CFR 55.40(b)(3), an authorized representative of the facility licensee shall approve the outlines, examinations, and tests before they are submitted to the NRC for review and approval. All materials shall be complete and ready to use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on June 30, 2006.

The public reporting burden for this collection is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, or by Internet electronic mail at BJS1@NRC.GOV; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, D.C. 20503-0001.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. McCall has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Peterson at 630-829-99707, or me at 630-829-9631.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Lanksbury', with a stylized flourish at the end.

Subject: Response to NRC Regulatory Issue Summary 2003-14
"Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary (RIS) 2003-14, "Preparation and Scheduling of Operator Licensing Examinations," dated August 27, 2003.

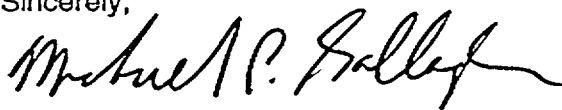

In the Reference letter, the NRC requested licensees to voluntarily submit a response concerning initial operator licensing examination needs, including an estimate of the number of applicants to be examined and intentions regarding the preparation of the examinations.

Attachments 1 through 10 provide the responses to RIS 2003-14 for the Exelon Generation Company, LLC (Exelon) and AmerGen Energy Company, LLC (AmerGen) plants identified above. The operator licensing examination information for each facility is provided on a separate NRC Form 536.

During Calendar Year CY 2005, a total of 6 candidates are expected to take the dual site Limited Senior Reactor Operator (LSRO) initial license examination as indicated in Attachment 6. The schedule for the indicated exam is as follows: the written exam and part of the operating exam will be given at Limerick Generating Station (LGS); the remainder of the operating exam will be completed at Peach bottom Atomic Power Station (PBAPS). Since the LSRO exam is a dual site exam that involves both LGS and PBAPS, rather than repeating the same information on both attachments, the exam scheduling information is provided on Attachment 6 for LGS only and Attachment 8 for PBAPS references Attachment 6.

If you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

Michael P. Gallagher
Director, Licensing & Regulatory Affairs
Exelon Generation Company, LLC
AmerGen Energy Company, LLC

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
801 WARRENVILLE ROAD
LISLE, ILLINOIS 60532-4351

October 7, 2003

Mr. John L. Skolds, President
and Chief Nuclear Officer
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

Dear Mr. Skolds:

Our previous letter dated September 8, 2003, identified that preparation of the Clinton licensing examination would be based on the guidelines in Revision 8, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." However, in a subsequent telephone conversation on September 29, 2003, between Mr. Hironori Peterson, Chief Examiner, and Mr. Ken McCall, Operations Training Manager, we understand that the examination will be prepared using the guidelines in Revision 9 of NUREG-1021. The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

Thank you for your cooperation in this matter. Mr. K. McCall has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. H. Peterson at 630-829-9707, or me at 630-829-9631.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

A handwritten signature in black ink, appearing to read "R. Lanksbury".

Roger D. Lanksbury, Chief
Operations Branch
Division of Reactor Safety

Subject: Submittal of Integrated Initial License Training Examination Materials

Enclosed are the examination materials which Amergen Energy Company (AmerGen), LLC is submitting in support of the Initial License Examination scheduled for the weeks of 1/5/2004 and 1/12/2004 at Clinton Power Station. This submittal includes the Senior Reactor Operator and Reactor Operator Written Examinations, Job Performance Measures, Integrated Plant Operation Scenario Guides and Clinton Power Station Suppressed K/As.

These examination materials have been developed in accordance with NUREG-1021, "Operating Licensing Examination Standards," Revision 9. In accordance with NUREG-1021, Section ES-201, "Initial Operator Licensing Examination Process", please ensure that these materials are withheld from public disclosure until after the examinations are complete.

Should you have any questions related to this information, please contact Mr. Tom Pickley at (217) 937-4135.

Respectfully,

William S. Iliff
Regulatory Assurance Manager
Clinton Power Station
