

- 4231 Create, maintain, and make available NRC OpE electronic media.
- 4232 Continue ROERD Web page, IESSW web page, Web-based LER search, IDCCS, ROEIS, Web-based ASP d-base.
- 4233 Continue EPIX.
- 4332 Develop staff guidance for identifying safety problems based on OpE feedback (evaluation feedback).
- 4333 Incorporate review of LERs, inspection findings, and IRS reports in screening process.
- 4431 Identify communication needs for internal stakeholders/users of OpE.
- 4432 Establish mechanisms for routine and frequent communication among various OpE organizations.
- 4433 Use OpE lessons learned for knowledge transfer and training.
- 4531 Perform OpE evaluations to identify trends, recurring events, and safety issues.
- 4532 OpE evaluations should be packaged (by evaluators) to meet user needs.
- 4533 Clarify process for obtaining OpE information from inspectors and licensees to support OpE evaluations.
- 4133 Evaluate and use trended data; reliability, ASP, and generic reactor safety studies to obtain OpE information.
 - 632 Update procedures to reflect issuance of MD 6.4.
- 4631 Adopt processes and criteria for incorporating OpE insights into regulatory framework (i.e., licensing and inspection).
- 4731 Conduct assessment of implementation after 1 year.
- 4732 Develop effectiveness measures and metrics.
- 4733 Periodic assessment (every 3 years) should be conducted by stakeholder external to OpE program.
- 4632 Verify implementation of OpE insights by internal and external stakeholders.
