Mr. Paul H. Lohaus, Director  
 Office of State and Tribal Programs  
 U.S. Nuclear Regulatory Commission  
 Washington, DC 20555

Dear Mr. Lohaus:

As part of our on-going communications regarding the status of New Hampshire's progress on implementing program improvements in response to the Integrated Materials Performance Evaluation Program (IMPEP) review of the state's program, I offer you the following enclosures:

- An updated Program Improvement Work Plan dated April 9, 2004
- Updated "Monthly Inspection Status Summary Report" dated April 9, 2004
- Radioactive Material License Inspections Completed in the Year 2004 to date
- Radioactive Materials Inspection Schedules – 4<sup>th</sup> Quarter 2003, 1<sup>st</sup> and 2<sup>nd</sup> Quarters 2004
- Radioactive Materials Inspection Calendar – 1<sup>st</sup> quarter 2004
- Current Schedule of Initial Inspections for Newly-Issued Licensees

I would also like to take this opportunity to update you on changes that have occurred recently within the NH Department of Health and Human Services. In October of 2003, Governor Craig Benson appointed John Stephen as the Commissioner of the DHHS. Shortly after that, Mary Ann Cooney was promoted to Director of the Office of Community and Public Health. Both Commissioner Stephen and Director Cooney are committed to the OCPH's mission of protecting the public health of New Hampshire's citizens and to the work of the Bureau of Radiological Health (BRH).

In addition, as part of last year's budget process, the DHHS has been mandated by the legislature to restructure its business functions in order to find more cost effective and efficient ways to serve the public. Restructuring has been ongoing since February of 2004 and expected to be final by fall of 2004. The reorganization is a Department-wide effort; therefore all agencies, including the Bureau of Radiological Health will be affected. Although the re-organization plan is still in draft form, it is expected that the Bureau will remain in the Office of Community and Public Health (to be named Division of Public Health) under the Bureau of Prevention Services. Veronica Malmberg who was supervising the Bureau will be retiring effective April 30, 2004. In the interim, I have been asked to oversee the Bureau until the reorganization efforts are final.

STP-006 *Yumplate*  
 RIDS-SP05

Activities to address workforce issues, business operations, and adequacy and compatibility issues have continued. The following are updates on the ongoing issues we are addressing in these areas:

- At this time, the BRH's health physics positions remain fully staffed. Unfortunately, the specific information that we needed regarding Texas A&M's Five-week Applied Health Physics course was never received in a form that would allow internal approval by our financial office; therefore, it was not possible to enroll staff member Rick D'Alarcao into the May 2004 session of this course. However, we have now begun looking into his possible enrollment into the Applied Health Physics course offered by Oak Ridge Institute for Science and Education (ORISE). Our newest health physicist, Debanond Chakraborty, has successfully completed the NRC-sponsored "Licensing Practices and Procedures" course, and the "Inspection Procedures" course, and he will be attending the "Safety Aspects of Industrial Radiography" course the week of April 19, 2004.
- Contract work continues with Vicki Jeffs, Kentucky's former radioactive materials program manager, conducting license application reviews on behalf of the radiation control program.
- Contract work continues with former New Hampshire inspector, Mario Iannaccone, conducting inspections of radioactive material licensees on behalf of the program.
- We have exceeded the Radiological Health fee revenue projections for the year. The latest figures since the effective date of the program's fee-based rules is at nearly 110% of its projected revenue.
- The Radioactive Materials Section Supervisor, Dennis O'Dowd, continues providing weekly reports, which indicate the assignments each staff member has for the upcoming week and the status of the current week's work. These are reviewed each Friday and are extremely helpful in supporting the staff in prioritizing work assignments. In addition, the inspection schedule for the second quarter of 2004 has been completed, which includes initial inspections of newly issued licenses (as per the NRC's Manual Chapter 2800 inspection protocols). As noted previously, inspections and inspection report due dates are now scheduled well in advance so as to allow for mid-course corrections, should any be needed.
- As stated in our previous updates, in July 2003, the NH Division of Personnel approved the reclassification of the current Bureau Chief position to the new, higher paying, Radiation Health Physicist V level. The final step in the reclassification process requires the approval of the Governor and Executive Council. The Bureau has begun the next steps to seek final approval.
- Work continues by the program to adopt and update radiation control rules needed to achieve full compatibility with NRC. Mr. O'Dowd has begun the process of reconciling the NRC rules with the format required by the New Hampshire's Code of Administrative Rules. It is our intention to submit drafts for adoption of the updates at the end of May. Please note that although there have been delays in completing these from our original target dates, licenses continue to be appropriately amended to incorporate necessary changes.

Mr. Paul Lohaus  
April 13, 2004  
Page 2

As is evident, the state continues to make continuous progress in addressing the issues raised in the 2001 and 2002 IMPEP reports. Please feel free to call me with any questions. I may be reached directly at 603-271-4593 or via e-mail at [kfrey@dhhs.state.nh.us](mailto:kfrey@dhhs.state.nh.us). I look forward to our April 19<sup>th</sup> conference call.

Sincerely,

Kathryn Frey  
Administrator II  
OCPH Director's Office
