

Meeting of Vulnerability Assessment Committee
August 22, 2002

Definition: Ad hoc group of individuals throughout NMSS and NSIR with involvement in ensuring adequate assessment of vulnerabilities to threats to protection of radiological materials.

Review Statement of Work and its status

Key Messages:

1. an integrated assessment of all vulnerabilities to NMSS facilities/materials is ultimate product
2. accordingly, VA work of divisions needs to be coordinated with NMSS activity
3. keep me informed of contractor products and progress (SFPO and IMNS) and any thoughts on approach to VAs for division-specific facilities/materials (all)
4. will need division staff assistance as contractor looks at their facilities
 - site visit accompaniments
 - background information provided
 - defining sites not-yet-named in SOW
 - determination of approach to completing Yucca and MOX VAspotential options: get OGC to provide a conflict of interest waiver for Sandia, obtain another independent contractor, have the VA come in as part of the application
5. provide me staff names of others with VA interest in divisions
6. to facilitate exchange of information, will conduct periodic committee meetings
