 Subject: RE: Reference

release all

Mahendra:

I have requested both of those documents from our library. I tried to connect on-line to get them and it was not working. I will try that again. They might be available online. I know we have a copy of the one, but I believe those figures are in color and it might be nice to have a better copy. I will let you know if/when I get them.

The reference for the Stainless Steel that we are now using for the MPC analyses is "High-Temperature tensile and creep data for Inconel 600 304 stainless steel and SA106B carbon Steel," S.A. Chavez, G.E. Korth, D.M. Harper, and T.J. Walker, Nuclear Engineering and Design 148 (1994) 351-363.

I talked to Ken some more about Benjamin Spencer. That would require the NRC NRR pushing back their deliverable dates for their projects. I think if that is going to happen it would be best if the NRC pursued that from your side. I have not talked to Ben about that. I don't know how much of his time that would free up. I know he is working on one other NRC project also.

I will talk to you Monday.
 Thanks,
 Jeff

Jeff:

I called and left a message regarding the document listed as Reference no. 9 in section 5.0 of UCRL-ID-123577. I will appreciate if you can get a copy for me. Thanks.

Mahendra
