Desc: I am seeking any records the NRC may have concerning a nuclear reactor built in May 1999 for the University of Chicago's annual Scavenger Hunt. This device, built by undergraduates Justin Kasper and Fred Niell, has become a campus legend, which my associates and I are researching. We believe that disclosure of these records poses neither a homeland security threat nor a risk to the privacy of its builders.

Upon the completion of our research, we intend to place these records in the Special Collections department of the University libraries. As such, we are requesting that this request be treated under academic institution pricing. Please contact me if photocopying charges will be incurred.
