SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION, UNITS 1 AND 2 -
SUPPLEMENTAL RESPONSE TO THE APRIL 29, 2003, ORDERS MODIFYING
LICENSES FOR REVISED DESIGN BASIS THREAT (TAC NOS. MC2906 AND
MC2907)

Dear Mr. Blevins:

On April 29, 2003, the U.S. Nuclear Regulatory Commission (NRC) issued Orders modifying the operating licenses for the Comanche Peak Steam Electric Station, Units 1 and 2, to: (1) require compliance with a revised design basis threat (DBT); (2) implement new security force personnel training and physical fitness requirements; and (3) prescribe compensatory measures related to fitness-for-duty enhancements applicable to security force personnel.

Section III.A.1 of EA-03-086 (DBT Order) required that all licensees submit revised physical security plans, safeguards contingency plans, and guard training and qualification plans, including an implementation schedule, based on the revised DBT, to the Commission for review and approval no later than April 29, 2004. The Order further requires licensees to implement the revised physical security plans, revised safeguards contingency plans, and revised security force personnel training and qualification plans no later than October 29, 2004.

By letter dated April 29, 2004, you submitted a supplemental response to the Orders for the Comanche Peak Steam Electric Station, Units 1 and 2. During the acceptance review of your submittal by NRC staff, the need for additional information in Attachment E was identified. The need for additional information was discussed with Mr. Don Alps, Mr. Gregory Bell and others of your staff on May 12, 2004. Mr. Bell has agreed to furnish the revised Attachment E by May 27, 2004.

The NRC staff will be reviewing your physical security plan in the months of May and June, your training and qualification plan during July, and your contingency plan during August. Should further information regarding your submittal be necessary to support our review, you will be notified promptly.

M. R. Blevins
