MEMORANDUM TO: Stuart Reiter
Chief Information Officer

FROM: G. Paul Bollwerk
Chief Administrative Judge

SUBJECT: OBTAINING A DOMAIN NAME FOR THE LICENSING SUPPORT NETWORK (LSN).

ASLBP has reserved the domain name LSNNET.GOV with General Services Administration (GSA). This domain name will be the URL for the Licensing Support Network (LSN). GSA has requested the following information.

"The next step is to send our domain manager a letter from the CIO of your agency, giving us permission to activate this domain name for you. The letter needs to be addressed to our domain manager and the contact information is on our web site. The original letter needs to be mailed but you can fax a copy to 703-306-6908 for a faster approval. The letter needs to be on your agency letter head. It needs to state the domain name you are requesting, the purpose of the domain, and permission for us to activate the domain. If you have any additional questions, please feel free to call the .GOV help desk at 703-676-1471."

In accordance with GSA's direction, we have drafted the attached authorization letter to GSA for your signature. If there are any questions, please contact Dan Graser at 415-7401.

Fairfax, Virginia 22030

SUBJECT: OBTAINING THE DOMAIN NAME LSNNET.GOV FOR THE NUCLEAR REGULATORY COMMISSION'S LICENSING SUPPORT NETWORK (LSN).

Dear Ms. Bhagowalia:

The U.S. Nuclear Regulatory Commission (NRC) requests the domain name LSNNET.GOV be assigned to a web portal we are currently developing, which will be known as the Licensing Support Network (LSN). The portal site, described in 10 CFR Part 2, Subpart J, will provide full text search and retrieval access to the relevant documents of NRC, the Department of Energy (DOE), the State of Nevada, Nye County, Nevada, and other parties and potential parties to the proceeding to license the construction of a geologic repository at Yucca Mountain, Nevada, for the storage of high-level waste (HLW) from commercial nuclear reactors.

The creation of the LSN was stimulated by the requirements of Section 114(d)(2) of the Nuclear Waste Policy Act of 1982 (NWPA) which direct the NRC to issue a decision on the DOE license application of the HLW repository within three years after receiving the application. In anticipation of substantial amounts of text documents being submitted by many different participants, the NRC regulations provide for the use of electronic information management system, the LSN, in the HLW repository licensing proceeding. Its use will commence during the time period before the DOE license application for the repository is submitted and will continue through the licensing proceeding.

As Chief Information Officer (CIO) of the NRC, I hereby provide permission for you to grant the domain name LSNNET.GOV for the above stated purpose. The sponsoring office within the NRC for this system is the Atomic Safety and Licensing Board Panel (ASLBP), which has designated Mr. Daniel J. Graser as the LSN Administrator responsible for its design and operation. If there are any questions, please contact Mr. Graser at (301) 415-7401.

Sincerely,

Stuart Reiter
Chief Information Officer
