

June 10, 2004

The Honorable George V. Voinovich, Chairman
Subcommittee on Clean Air, Climate Change,
and Nuclear Safety
Committee on Environment and Public Works
United States Senate
Washington, DC 20510

Dear Mr. Chairman:

The NRC has sent the enclosed revisions to the Commission's rules in 10 CFR Part 2, "Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders," to the Office of the Federal Register for publication as a final rule. The final rule revises the Commission's regulations on the use of the Licensing Support Network (LSN) in the licensing proceeding for the disposal of high-level waste (HLW) at a geologic repository. The LSN is an electronic information management system that would provide access to the relevant documents of parties to the HLW repository licensing proceeding. The LSN also provides for the electronic submission of filings by the parties during the proceeding. The final rule would establish the basic requirements for the submission of adjudicatory materials to the electronic docket, including the requirements for the submission of large and/or complex documents.

The final rule also addresses the loading of duplicate documents on LSN participant websites, the continuing obligation of LSN participants to update their material, and the timing of the provision of certain types of documentary material. The final rule would also establish an additional category of material, "Congressional correspondence," that may be excluded from the LSN.

Sincerely,

/RA/

Dennis K. Rathbun, Director
Office of Congressional Affairs

Enclosure: As stated

cc: Senator Thomas T. Carper
