**Subject:** Draft RAI on Your 1/9/04 Application for Amendment **(TAC MC1758 and MC1759)**

Dennis, John:

We are reviewing your 1/9/04 application for amendment regarding use of the BWRVIP Integrated Surveillance Program. Our reviewer Lambros Lois has the following question. Please call me to set up a conference call to discuss the question.

In the analysis section, regarding neutron fluence methodology compatibility, you conclude that using an NRC-approved methodology satisfies the BWRVIP conditions. Are you referring to BWRVIP-86-A, "BWR Vessel and Internals Project Updated BWR Integrated Surveillance Program (ISP) Implementation Plan," Section 4.2, Condition 2 (page B-16)? This document addresses the possibility of surveillance data sharing when more than one methodology may be employed. In this context, please supplement your application.

**This e-mail aims solely to prepare you and others for the proposed conference call. It does not state an NRC staff position, nor does it formally request for additional information.** Participants in the conference call will discuss disposition of this question.

Peter S. Tam, Senior Project Manager  
Project Directorate I-1  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation
