<b>Subject:</b> quarterly reports - response to 3/22 call		
<p>Glenn Roberts left the following responses to my 3/22 questions on my voice mail:</p> <ol style="list-style-type: none"><li>1. There were no river discharges until February 2004, so the 2003 Fourth Quarter report does not include any releases to the river.</li><li>2. He understands that the next report needs to include releases to the river and to sewer.</li><li>3. He would like to discuss format of future reports. (The questions was: Graphs currently use the sewer release limits as the limiting criteria. The river criteria is a factor of 10 lower, and needs to be used, or they should describe alternate methodology to demonstrate that they are meeting the public dose limits.)</li></ol>
