Subject: RI-97-A-0033 and 126 (Fitz)

Rich Barkley reviewed the OI transcript of the interview with the alleged. Rich noted that the alleged did not raise any new technical issues beyond those that the alleged brought to us and that the alleged provided more details on a couple of his technical issues and his H&I concern.

Recall that the alleged provided his concerns to the licensee, the licensee planned to follow up on these issues, and hence we decided to refer the technical issues to the licensee for follow up. The referral letter was mailed on 8/14/97. Since there are no new issues in the transcript, there is no reason to repanel. We will await the licensee's response to our referral letter.

This E-mail will serve to document our intended course of action and will be included in both allegation files (RI-97-A-0033 and RI-97-A-0126).
