Come see me, this is a very difficult case and we might be able to use your help. Currently, Joe Carrasco has reviewed the response, Alan Blamey is rereviewing and is planning on drafting a closure letter if possible. Gordon Huneg, RI is also reviewing.

Licensee also owes Joe more information. We are trying to determine what the alleged thought of the licensee response before we tell him what we think.

Also, this is tied to 97-A-0033 for Fitz.

One thing you could do is find out and status the OI piece of the allegation. Preliminary, I see no violations or further NRC followup, thus OI might be able to conclude the case and thus both case files are closable.

John,

I'm trying to close out this allegation file.

The latest item in the file is a response letter dated September 16, 1997 from the licensee to our referral letter dated August 14, 1997.

What is the status of the review of the licensee's response?

Thanks for your help.

Jim
