- References:*
- 1) 10 CFR 73.21, "Requirements for the Protection of Safeguards Information"
  - 2) NRC Regulatory Issue Summary 2002-15, "NRC Approval of Commercial Data Encryption Systems for the Electronic Transmission of Safeguards Information"

Pursuant to the requirements of 10 CFR 73.21(g)(3), PPL Susquehanna, LLC (PPL) requests approval to process and transmit Safeguards Information (SGI) using PGP Software (Enterprise, Corporate, or Personal) Desktop Version 8.0 or the latest validated version, developed with PGP SDK 3.0.3. National Institute of Standards and Technology Certificate 394 validates compliance of this SDK with FIPS 140-2 requirements.

An information protection system for SGI that meets the requirements of 10 CFR 73.21(b) through (i) has been established and is being maintained. Prior to the first use of encryption software for SGI material, written procedures shall be in place to describe, as a minimum: access controls; where and when encrypted communications can be made; how encryption keys, codes and passwords will be protected from compromise; actions to be taken if the encryption keys, codes or passwords are, or are suspected to have been, compromised (for example, notification of all authorized users); and how the identity and access authorization of the recipient will be verified.

PPL intends to exchange SGI with the NRC, Nuclear Energy Institute (NEI), and other SGI holders who have received NRC approval to use PGP software. Mr. Brian P. McBride, Security Support Supervisor, is responsible for the overall implementation of the SGI encryption program at PPL. Mr. Brian P. McBride, Security Support Supervisor, is also responsible for collecting, safeguarding, and disseminating the software tools needed for encryption and decryption of SGI.

5008

Pursuant to 10 CFR 73.21(g)(3), the transmission of encrypted material to other authorized SGI holders, who have received NRC approval to use PGP software, would be considered a protected telecommunications system. The transmission and dissemination of unencrypted SGI is subject to the provisions of 10 CFR 73.21(g)(1) and (2).

Should you have any questions or require additional information, please contact Mr. Brian P. McBride, Security Support Supervisor, at (570) 542-3977

Sincerely,

Bryce L. Shriver
