NAME AUTHORITY LIST	11

1.0 INTRODUCTION

The Organization Name Authority List is a controlled vocabulary for use in the LSS to indicate the affiliation of an author or addressee and to name a sponsoring agency or organization. The list uses standard abbreviations and contains guidelines for how organization names appear. While the list is controlled, it is not closed and can be added to as necessary.

The Organization Name Authority List is in a two-column format. The first column contains variations of an organization name as it may appear in a document. The second column gives the format as it appears in the LSS. The same organization may appear in the list several times to provide access in a variety of forms.

Following are the rules used for generating organization name abbreviations, a list of abbreviations used for common words, and lists of two-letter state and three-letter country codes used.

2.0 ORGANIZATION NAME STANDARDIZATION RULES AND GUIDELINES

The following procedures are used in creating new organization name entries. Organization names are entered in an abbreviated form, except in cases where the existing organization name cannot be logically shortened. All names are listed in the abbreviated form and with the full organization name. Only the abbreviated form is used as an entry; the full organization name and variations appear as cross-references.

- 1) Check the Organization Name Authority List for all possible variations before creating a new entry.
- 2) Use commonly known and used acronyms, i.e., ones that would be recognized by users. The same abbreviated form cannot be used for two different organizations. If two organizations have the same acronym, each one must also have a short name following the acronym in parentheses, to make each entry unique.

Example: NEA (Nucl Energy Agcy) and NEA (Natl Educ Assn)

Exception: Due to its high volume of usage, NRC alone always stands for Nuclear Regulatory Commission and is entered without a short name following. Other organizations with the same acronym, such as National

Research Council, appear with the short title in parentheses: NRC (Natl Res Coun).

- 3) The words "Company," "Corporation," "Incorporated," and "Limited" are dropped from the end of an abbreviated organization name unless they are needed for clarity.
- 4) Use a full format as close to the true form of the name as possible. The use of "&" for the word "and" is preferred unless the organization specifically spells the word out. In the abbreviated form, drop the "and" or "&" except when it occurs as part of a common acronym.

Example: Holmes Narver for Holmes & Narver, but CP&L for Carolina Power & Light

- 5) Do not use punctuation if possible. Hyphens are replaced by spaces, and all accent marks are dropped from foreign names.
- 6) Abbreviate any words appearing in Table 1, Standard Abbreviations for Organizations.

Example: Bur Natl Aff for Bureau of National Affairs

- 7) Use the U.S. Postal Service abbreviations for state names and names of U.S. territories as they appear in Table 2, State and Territory Codes.

Example: VA for Virginia
PR for Puerto Rico

- 8) Always identify a state government or agency with the state abbreviation at the beginning of the name. Eliminate the word "state" from the entry unless it is part of the official name, such as Florida Department of State, and Ohio State University.

Example: MS Geol Surv but OH State Univ

- 9) Simplify city and county government agencies as much as possible. Use the city or county name at the beginning followed by the two-character state abbreviation. In general, state codes should immediately follow the name of the city.

Example: Oak Ridge TN for City of Oak Ridge Tennessee

- 10) For universities, drop the word "of" from the name and use the state abbreviation where appropriate. Commonly known abbreviations should be used when they exist.

Example: Univ CA Berkeley for University of California at Berkeley
UCLA for University of California at Los Angeles

- 11) If a personal name is part of the organization name, use the initials of the first and middle names followed by the last name. Do not use the last name alone.

Example: RF Weston for Roy F. Weston Inc.

- 12) Shorten organization names that consist of three or more personal names by using the first two names only.

Example: Leboeuf Lamb for Leboeuf Lamb Leiby and Macrae

- 13) Drop "The" from the beginning of name.

Example: Washington Post for The Washington Post

- 14) If both the English and foreign language versions of a foreign name are available, use the English version to create the valid forms. Enter the foreign version as a cross-reference. If an English version is not available, use the foreign name as it appears on the document.

Example: OECD for Organization for Economic Cooperation and Development (Organisation de Cooperation et Development Economique)

- 15) Follow foreign company, association and university names with the three-letter country abbreviation as it appears in Table 3, Country Codes.

**LICENSING SUPPORT SYSTEM
ORGANIZATION NAME AUTHORITY LIST**

12 OCTOBER 1990

Example: Oxford Univ UKB
AECL CAN

- 16) Drop "U.S." from government agency names unless it is commonly used in the abbreviated form.

Example: Army Corps Engrs for U.S. Army Corps of Engineers
USGS for U.S. Geological Survey

Exceptions: Congressional offices retain the U.S., but without punctuation.

Example: US Off Pres for U.S. Office of the President
US Cong for U.S. Congress

- 17) Drop internal prepositions such as "of" and "for" from the approved short names of the organization.

Example: Univ MD for University of Maryland
Cntr Envir Man for Center for Environment and Man, Inc

- 18) For government agencies, the office name which appears on the document as sponsoring agency or author affiliation should be used, not the larger agency under which it falls.

Example: Forest Serv for USDA
USGS for Department of the Interior

- 19) Do not distinguish among divisions/segments of a company. Use the company name, not the company plus the division.

Example: Amoco for Amoco Prod
Magnolia Petro for Magnolia Petro Field Res Labs

- 20) With the exception of state and country codes, use all upper case only when each letter in the abbreviation replaces a word. Otherwise, use initial caps followed by lower case.

Example: NRC ACRS for Nuclear Regulatory Commission Advisory
Committee for Reactor Safeguards
