East Hartford, CT 06108

**SUBJECT: UNITED TECHNOLOGIES COMPANY, REQUEST FOR ADDITIONAL INFORMATION CONCERNING APPLICATION FOR AMENDMENT TO LICENSE, CONTROL NO. 134877**

Dear Mr. Rivera:

This is in reference to your letter dated April 15, 2004 requesting to terminate Nuclear Regulatory Commission License No. 06-07522-02. In order to continue our review, we need the following additional information:

The current Amendment (44) of License No. 06-07522-02 only allows for the use and possession of sealed sources of gadolinium-153. However, you have a licensing history which dates back to 1963. Between 1963 and 1997, your license permitted the use of numerous other sources, such as carbon-14, sulfur-35, and various sealed sources and foils. 10 CFR 30.36(j)(1) requires a licensee to certify the disposition of all licensed material prior to completion of decommissioning. Because previous license amendments to remove sources did not require record of final disposal, assurance is required that these previously-approved materials are no longer at the licensed facility. Written notification that the facility is devoid of all material previously licensed under License No. 06-07522-02 is required before the termination of this license may be completed.

In accordance with 10 CFR 2.790, a copy of this letter will be placed in the NRC Public Document Room and will be accessible from the NRC Web site at <http://www.nrc.gov/reading-rm.html>.

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 134877. If you have any technical questions regarding this deficiency letter, please call Marjorie McLaughlin at (610) 337-5240.

C. Rivera  
United Technologies Company
