SUBJECT: Answer to Issuance of First Revised NRC Order (EA-03-009) Establishing Interim Inspection Requirements for Reactor Pressure Vessel Heads at Pressurized Water Reactors

Arkansas Nuclear One, Unit 1
Docket No. 50-313
License No. DPR-51

Dear Ms. Vietti-Cook,

In accordance with 10 C.F.R. § 2.202(a)(2), Entergy Operations, Inc. ("Entergy"), hereby submits for filing its answer to the February 20, 2004, First Revised NRC Order (EA-03-009) Establishing Interim Inspection Requirements for Reactor Pressure Vessel Heads at Pressurized Water Reactors and a related Certificate of Service in the captioned matter. Entergy does not request a hearing on the Order. Entergy consents to the Order modifying the license of Arkansas Nuclear One, Unit 1 (ANO-1) as delineated in Section IV thereof.

This letter contains no new commitments. If you have any questions or require additional information, please contact Steve Bennett at 479-858-4626.

Sincerely,

for J. Forbes

LICENSEE'S ANSWER TO FEBRUARY 20, 2004 FIRST REVISED COMMISSION ORDER MODIFYING LICENSE ESTABLISHING INTERIM INSPECTION REQUIREMENTS FOR REACTOR PRESSURE VESSEL HEADS AT PRESSURIZED WATER REACTORS

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of	)	
	)	
Entergy Operations, Inc.	)	Docket No. 50-313
	)	License No. DPR-51
Arkansas Nuclear One, Unit 1	)	

LICENSEE'S ANSWER TO FEBRUARY 20, 2004
FIRST REVISED COMMISSION ORDER MODIFYING LICENSE
ESTABLISHING INTERIM INSPECTION REQUIREMENTS
FOR REACTOR PRESSURE VESSEL HEADS AT
PRESSURIZED WATER REACTORS

On February 20, 2004, the Nuclear Regulatory Commission ("NRC" or "Commission") issued an immediately effective order in the captioned matter entitled First Revised Order Modifying Licenses (Effective Immediately) ("Order") to, *inter alia,* Entergy Operations, Inc. ("Entergy"). This Order supercedes the original Order Modifying Licenses, which was issued on February 11, 2003. The Order stated that recent experience indicated that current inspection requirements in Section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code ("ASME Code") and related NRC regulations do not provide adequate assurance that reactor coolant pressure boundary integrity will be maintained for all combinations of construction materials, operating conditions, and operating histories at pressurized water reactors ("PWRs"). The Commission stated that long-term resolution of reactor pressure vessel ("RPV") head penetration inspection requirements is expected to involve changes to the ASME Code and NRC regulations, specifically 10 C.F.R. § 50.55a. Consequently, the Commission stated that it was necessary to establish a minimum set of RPV head inspection requirements, as a supplement to existing inspection and other requirements in the ASME Code and NRC regulations, through the issuance of the Order. Therefore, the Commission imposed interim inspection requirements set forth in Section IV of the Order

pending the development of consensus standards and incorporation of revised inspection requirements into 10 C.F.R. § 50.55a, directly or through reference to a future version of the ASME Code.

Pursuant to 10 C.F.R. § 2.202(d), Entergy consents to the Order modifying the license as set forth in Section IV of the Order for performing inspections of the Arkansas Nuclear One, Unit 1, reactor pressure vessel head. Entergy does not request a hearing on the Order.

I declare under penalty of perjury that the foregoing is true and correct. Executed on March 11, 2004.

Respectfully submitted,
Entergy Operations, Inc.

for J. Forbes
