Subject: License Renewal for Units 1 & 2 at Point Beach Nuclear Plant

This letter is in support of the license renewal for the two units at the Point Beach nuclear plant.

Wisconsin leads the nation in the production of paper and papermaking is one of Wisconsin's key industries. Wisconsin's paper mills provide dependable, family supporting jobs throughout the state. Wisconsin's paper mills require dependable and affordable energy. The two units at Point Beach are an integral part of WE Energies energy mix and the energy mix of the entire state and are key to meeting these energy requirements.

The current increases in the price of oil and natural gas are proof that base load generating plants must operate on stable, dependable and low cost fuels. Nuclear fuel meets this requirement. In addition, the two units at Point Beach are safe and environmentally friendly.

Very truly yours,

Robert F. Domrois,

Controller

Wisconsin Paperboard Corp.

This letter is in support of the license renewal for the two units at the Point
