**Subject:** Telephone discussion of 6/14/2004  
**Place:** LAT@nrc.gov

During the telephone discussion of 6/14/2004, you requested the status of amendment requests to Thomas Jefferson Univ. Hosp. (LN 37-07942-01) and St. Agnes Medical Center (LN 37-13651-01). These actions have been assigned to me and have not been reviewed as of the current date.

You expressed concern over the fact that St. Agnes' administration requested that the license be terminated and that they would cease to be an acute-care facility as of midnight June 14, 2004. You wondered what effect this would have on their ability to continue licensed operations as of June 15, 2004.

To allay your concerns, I am sending you this e-mail and cc'ed the Acting Branch Chief and the Licensing Assistance Team at the NRC. Licensed operations may continue under the license issued to St. Agnes until such time as it is terminated and concurrent with the issuance of an amendment to the license of Thomas Jefferson including St. Agnes Medical Center as a place of use.

We appreciate your continued cooperation with the NRC.

Sincerely,

Steven R. Courtemanche  
Health Physicist
