MEMORANDUM TO: Sunil Weerakkody, Section Chief
Fire Protection and Special Projects Section
Division of Systems Safety and Analysis, NRR

FROM: Paul Lain, Fire Protection Engineer **//RA//**
Fire Protection and Special Projects Section
Division of Systems Safety and Analysis, NRR

SUBJECT: SUMMARY OF JUNE 16, 2004, MEETING WITH NUCLEAR ENERGY
INSTITUTE ON IMPLEMENTING GUIDANCE FOR NFPA 805

On June 16, 2004, Nuclear Regulatory Commission (NRC) staff met with representatives of the Nuclear Energy Institute (NEI) and industry to continue discussion of NEI 04-02, "Guidance for Implementing a Risk-Informed, Performance-Based Fire Protection Program under 10 CFR 50.48(c)." NEI 04-02 is the industry guidance for implementation of National Fire Protection Association (NFPA) standard NFPA 805, "Standard on Performance-Based Fire Protection for Light Water Reactor Electric Generation Plants." A list of those attending the meeting, including those on the conference call line is provided in Attachment 1. Staff comments on NEI 04-02, Revision E is provided in Attachment 2 (ADAMS Accession # ML041320118). NEI handouts provided at the meeting are in Attachment 3 (ADAMS Accession # ML041760481).

After introductions, NEI discussed their resolution to certain staff comments on NEI 04-02. Highlights of the discussion include the plant change evaluation, standard license condition, "free of fire damage" requirement, document references, design basis document, recovery actions, alternate and dedicated shutdown, "previously approved" licensing basis, and fire risk assessment. NEI discussed resolution for each of the highlighted issues. The NRC agreed with most of the resolutions and agreed to have further discussions on the handling of alternate/dedicated shutdown and previously approved licensing basis.

Having discussed the staff's comments and having asked for public comments or questions, the meeting was adjourned.
