Dear Sir or Maddam,

I am in favor of the license renewal for the Point Beach Nuclear Plant. It is imparitive that energy costs are kept to a minimum, and energy supply levels are such that buying power from outside the state is not needed.

Energy costs are a large portion of our companies daily manufacturing expenses. Every penny counts and can make the difference of making money, loosing money and getting new orders. So I urge the NRC to give WE Energies a two year operating license for this facility.

Yours truly,

Chad E. Cordle
