Dear Ms. Dohn:

I will mail you a copy of the proposed comprehensive plan map which indicates the areas proposed for residential development in the Village. As you will see the yellow area is proposed for single family residential development and I would guess that this is about 50% of the land area of the Village. I would have to say that the main change in land use from the 1970's would be an increase in the area used for commercial purposes. There has been a large increase in the amount of land used for golf course purposes and condominium development. I would anticipate continued growth in the resort use as the Fox Hills Resort expands and I see a need for continued single and two family residential development. Along with the zoning code growth control measures are supported through our subdivision ordinance, comprehensive plan and official map ordinance. All residential subdivisions are subject to review by the Village Plan Commission as well as final approval by the Village Board. Should you desire any further information please don't hesitate to contact me.

Sincerely,
James Bydalek
Village Clerk
