**Subject:** Re: re FS47?

Mr. Clements:

We anticipate issuing a letter to the U.S. Department of Transportation regarding the results of our technical review of the FS47 package design around the end of this month. The letter will include our recommendation regarding U.S. DOT revalidation of the French certificate for the proposed export shipment. Documents used in our technical review are publicly available in the ADAMS system. The public does not participate in our technical review process. However, the letter to DOT will be publicly available, consistent with NRC policy.

Sincerely,  
Nancy Osgood

Hello Ms. Osgood,

I would like to know the status of the certification of the FS47 plutonium shipping container. Also, could you please inform me if the public is given a formal opportunity to comment on such certification?

Thanks for your response to this message.
