Subject: Question to Mark Delligatti of the NRC

2/11/04
69FR 5374
191

When the Government had a lot of regulation in force at the enrichment plant at Paducah Kentucky, people got sick.

Now the NRC wants to license an enrichment plant (of a company with a bad reputation-Urenco) and there will be even less regulation here in New Mexico than in Kentucky.

The NRC also objects to state officials being involved in the licensing process.

Why should we trust the NRC?

Phillip Barr
Lea County
