Dr. Nils J. Diaz, Chairman  
U.S. Nuclear Regulatory Commission  
Office of Public Affairs  
Washington, DC 20555-0001

Dear Dr. Diaz,

Aging nuclear power plants present a significant health and safety risk for the public and the environment. As a member of the Union of Concerned Scientists, I urge you to *increase* the safety of nuclear reactors across the country. The licensing process must include the full and meaningful participation of the public – involvement the NRC itself found enhance safety levels. And if today's existing nuclear reactors are to be licensed for 20-year terms, they should have to meet today's safety standards, and have strong aging-management programs to ensure that failures are found before it is too late. Please do all you can to increase the safety of nuclear power plants.

I thank you for your time and your attention to this extremely important issue.

Sincerely,

Sarah Webber
