

July 22, 2004

Mr. Peter Sandgren
Connecticut Office of Emergency Management
360 Broad Street
Hartford, CT 06105

Dear Mr. Sandgren:

The Nuclear Regulatory Commission (NRC) has a project underway to upgrade the geographic information system (GIS) used in the Headquarters Operations Center. Some of the critical data layers in that mapping system are the protective action sectors or zones (for evacuation and sheltering decisions), evacuation routes, and the locations of reception centers and emergency operations facilities (EOFs). It is essential that this information remain current so that in an emergency we are all looking at the same maps.

This letter is to ask you to provide any available GIS data you might have developed for support of events at the commercial nuclear power plants in your state. We are especially interested in the critical data listed above.

If you have any questions, please contact either me or the contractor, George Athey at (304) 725-8834 or atheyconsulting@frontiernet.net.

Please mail any information available on a CD-ROM to:

Athey Consulting
32 Old Cave Road
Charles Town, WV 25414

Thank you for your assistance.

Sincerely,

/RA/

Stephen A. McGuire
Emergency Response Coordinator
Incident Response Directorate
Office of Nuclear Security and Incident Response
