MEMORANDUM TO: Laura A. Dudes, Section Chief
New Reactors Section
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

FROM: Michael L. Scott, Senior Project Manager */RA/*
New Reactors Section
New, Research and Test Reactors Program
Division of Regulatory Improvement Programs
Office of Nuclear Reactor Regulation

SUBJECT: JULY 22, 2004, NORTH ANNA EARLY SITE PERMIT TELEPHONE
CONFERENCE CALL SUMMARY

On Thursday, July 22, 2004, a telephone conference call was held between Dominion Energy (Dominion, the applicant) representatives and the Nuclear Regulatory Commission (NRC) project manager (PM) for review of Dominion's early site permit (ESP) application. Dominion initiated the call. They advised the NRC staff that they have elected to revise the approach in their ESP application to demonstrate compliance with applicable NRC seismic regulations. They stated that they plan to use the NRC-approved Regulatory Guide 1.165 method with justification for a reference probability of 5×10^{-5} . Dominion stated that they plan to respond to all requests for additional information related to seismology that the staff has sent to date, regardless of whether the responses are germane to the revised compliance demonstration approach. They added that the next revision to the ESP application will reflect this change.

The PM informed the applicant that, upon receipt of the revised compliance argument, the NRC staff will review the revised approach and will note in its safety evaluation report that the staff did not review the "performance-based" approach (the approach currently reflected in the ESP application).

A list of participants in this phone conference is attached.
