Subject: Need EMPAC historic data?? Try EHIS!

With the CVAX server still inoperable, users looking for historic MPAC data can utilize the EMPAC EHIS instance. This is a special "copy" of EMPAC that contains gobs of MPAC UX data that is not in the normal EMPAC instance.

If you need EHIS to be installed on your computer, call Jeff Lodge at x-4209 to have it remotely installed. You must:

1. Have your computer turned on.
2. Log out of your computer.
3. Call me.
4. Give me 2-5 minutes to install the program remotely.
