4. Letter to Mr. Greg D. Brown, Grand Gulf Nuclear Station, Unit 1 – Request For Additional Information Re: Training and Qualification Plan (TAC No. MC2924) received July 12, 2004

Dear Sir or Madam:

Entergy is in receipt of the referenced letters containing requests for additional information (RAIs). In order to standardize our fleet approach with the NRC-approved industry approach, Entergy's April 29, 2004 responses to Order EA-03-086 were strictly based on NEI-03-12, "Template for the Security Plan, Training and Qualification Plan, Safeguards Contingency Plan" Revision 1 as approved by the staff in a letter from Roy P. Zimmerman to Steven D. Floyd dated June 10, 2003. Because the NRC questions for our facilities are very similar, Entergy is collectively providing a single combined response for ANO, GGNS, RBS and W3 (hereinafter "Entergy").

NRC questions either request modifications to the template language (indicated with an \* in the Enclosure) or to licensee-provided details (i.e., bracketed template information). Where template language is involved, Entergy will be adopting revised language that has been agreed to between the industry Security Working Group (SWG) licensee representatives and the staff as described herein. Entergy is an active member of the SWG licensee representatives that will meet with the staff for this purpose. We believe this approach will be the most responsive and will maintain mutually desired consistency. Where agreement has not been achieved as of the writing of this response, Entergy intends to adopt the language that is deemed acceptable to the Commission and responsive to the NRC issues following the industry frequently asked question (FAQ) process and the final disposition of any industry appeals. Responses that rely on this process are discussed in the specific question responses. We believe that sufficient detail is provided here to enable the staff to conclude the issue can be appropriately resolved subject to later submittal of changed pages incorporating known acceptable language (i.e., a revision of the Security Plan that incorporates all required responses). Entergy proposes to provide revised Security Plans or replacement pages later for each site that incorporate all of our required RAI responses on a schedule to be determined with the staff.

This letter includes new commitments as summarized in the Attachment. If you have any questions or require additional information, please contact Mr. Les England at 601-368-5766.

**NOTICE: Enclosure contains "Safeguards Information." Upon separation of The Enclosure, this letter and the Attachment become "DECONTROLLED"**
