AFFIDAVIT OF HARRY E. LEAKE

I, Harry E. Leake, do swear that the following is true and correct and that, if called as a witness, I would testify as follows:

1. I am the Licensing Support Network Project Manager for the Office of Civilian Radioactive Waste Management (OCRWM), Department of Energy (DEN). My responsibilities include overall management of DEN's participant server for the Licensing Support Network (LSN) system. I have held this position since January 2003.

2. I am the person who made the estimate for DEN's production of 3-4 million documents that was provided to the LSN Administrator in April **2003**. That estimate was provided to help the LSN Administrator adequately size the LSN. I made the estimate at a very preliminary stage of the collection process and was not able to rely on actual document counts. Further, I made the estimate without regard to any particular definition of documentary material.

3. To process the documents for the LSN system, DEN and CACI, Inc.-Commercial (CACI) had to ensure that legible electronic files were created of the documents' image and text, create bibliographic headers for the documents, and screen the documents to ensure that sensitive-unclassified, Privacy Act, or privileged information was not released to the public.

Then, the electronic file of the documents needs to be shipped to the location of DEN's participant server where additional processing steps include validating the transmittal, loading the content manager, updating the search engine, and exporting to the web server.

4. DEN adopted the April 15 cut-off date, in consultation with CACI and BSC, as the lead time CACI and BSC needed to complete those activities. It provided time for record originators in OCRWM to submit records and time for processing these records into the Records Management System. It also allowed time for CACI to process documents, pursuant to procedures, into the required electronic format to support initial certification.

5. DEN has procedures in place for CACI to process and produce documents it receives after April 15, 2004.

6. On June 30, 2004, DEN loaded onto its participant server the electronic files containing the bibliographic headers of its documentary material and, where appropriate, the electronic images and text of those materials. Those files are compatible with the LSN Administrator's indexing software and meet the technical requirements of the Nuclear Regulatory Commission's (NRC) regulations.

7. On June 30, 2004, DEN made all those files available to the LSN Administrator. Also on June 30, 2004, DEN made all these files available on the Internet through a link on its website, which connects the user to DEN's participant server.

8. DEN also made available on June 30, 2004, through its website an index of the files on its participant website. The website includes a search engine that allows searches of both headers and text in a manner similar to the LSN Administrator's website.

9. Prior to June 30, 2004, DEN has been cooperating with the LSN Administrator to expedite the LSN Administrator's auditing and indexing of DEN's documentary material.

Beginning on May 5, 2004, DEN provided its documentary material to the LSN Administrator for indexing according to the LSN Administrator's "Access Control Guidelines" that he adopted in March 2004.

10. When DEN began to provide its documentary material for early crawling, the LSN Administrator estimated that he could index 30,000 documents a day/150,000 documents a week. At that rate, there would have been sufficient time between May 5, when DEN started providing documents, and June 30 for the LSN Administrator to index the number of documents that DEN produced in full text.

11. The LSN Administrator experienced initial technical problems that delayed the indexing process.

12. Near the date of its initial certification, DEN identified privileged documents that had been indexed as part of the early crawling process and that needed to be removed from the index before DEN's certification, as permitted by the Access Control Guidelines. Processing these necessary changes further limited the number of documents the LSN Administrator could index before DEN's initial certification.

13. The LSN Administrator indexed approximately 500,000 (or about one-half) of DEN's full text documents by June 30, 2004.

14. DEN took its website off-line for four and a half days starting on July 1. This was done to safeguard the content of certain documents that contain privacy protected information and that were inadvertently made available in full text format through DEN's website. The problem was fixed as expeditiously as possible, and the website was turned back on the morning of July 6, 2004.

15. Since June 30, DEN has worked with the LSN Administrator to verify that his index does not contain the text of any privileged documents crawled before June 30. The LSN Administrator has verified to DEN that this is the case.

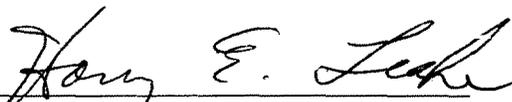

16. The LSN Administrator made available to the public on July 14, 2004 his partial index of the documents on DEN's participant server.

17. DEN is able to provide the LSN Administrator each day with as many files that his office can index when the LSN Administrator informs DEN that it is ready to resume the indexing of DEN's collection.

18. It is my understanding that the LSN Administrator has temporarily ceased indexing because of technical difficulties with his indexing system. It is DEN's belief that these difficulties are not due to problems with DEN's electronic files.

19. DEN will continue to offer public access to the electronic files on its participant server and the associated index through its website.

I declare under penalty of perjury that the foregoing is true and correct. Executed on July 22, 2004.

Harry E. Leake

AFFIDAVIT OF BEATRICE E. REILLY

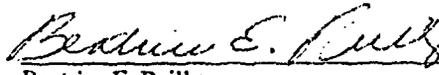

I, Beatrice E. Reilly, do swear that the following is true and correct and that, if called as a witness, I would testify as follows:

1. I am the Internal and External Communications Manager for Bechtel SAIC Company, LCC (BSC). My responsibilities include managing public information and internal communications activities for the Yucca Mountain Project. I have held this position since 1991 on the Yucca Mountain Project.
2. BSC is a contractor to the U.S. Department of Energy (DEN). Part of BSC's responsibilities for DEN include operating the Yucca Mountain Las Vegas Information Center (LVIC).
3. BSC staffs the LVIC with its Communication Department personnel, and they have high-speed computerized access to the Internet. Also, members of the public can literally walk into the LVIC and gain entry to the DEN's participant server through the LVIC's two available computers. Moreover, the center is equipped to accommodate visitors with physical disabilities. The LVIC has been in operation for more than a decade.

4. The LVIC anticipated that with the release of documents to the Licensing Support Network (LSN) system, it would receive an increased volume of inquiries. As a result, in April 2004, the LVIC began to plan for the LSN system's debut, including the increased volume of queries.
5. As part of that effort, personnel at the LVIC were advised before June 30 that they would be designated as the point of contact for public queries regarding the LSN.
6. Procedures and processes were developed in advance of June 30 to assist LVIC personnel in answering public queries about the LSN. Specifically, BSC developed a Concept of Operations to address external requests that related to the LSN system. This Concept of Operation has been in place since June 21, 2004.
7. According to the Concept of Operations, personnel at the LVIC will respond to calls and document all calls in a database. The LVIC also assists users in accessing documents without an image and addressing concerns over material on the LSN by forwarding these inquiries to CACI, Inc.
8. If the LVIC receives a request not related to a specific document, LVIC directs the caller to the DEN participant server and answers the caller's general questions.
9. LVIC personnel were trained regarding these processes and procedures on June 23, 2004.
10. To gain access to the services provided by the LVIC, the public can contact the LVIC through several methods: (i) LVIC's published local Nevada phone numbers; (ii) LVIC's 1-800 number; (iii) walk-ins to the LVIC center; and (iv) written inquiries, including emails.

11. I am not aware of any member of the LVIC staff who, in response to a call after DEN activated its web link to its LSN collection, stated ignorance of the LSN or the LVIC's role in responding to public queries regarding it.

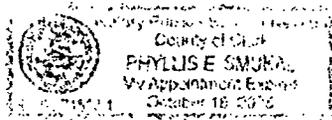

I declare under penalty of perjury that the foregoing is true and correct. Executed on July 22, 2004.

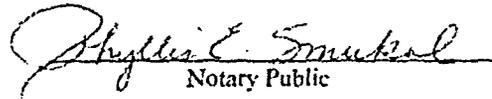

Beatrice E. Reilly

AFFIDAVIT OF COLLEEN M. LURWICK

I, Colleen M. Lurwick, do swear that the following is true and correct and that, if called as a witness, I would testify as follows:

1. I am a senior vice-president for CACI, Inc.-- Commercial (CACI). CACI is the litigation support contractor for the Department of Energy (DEN) for the collection and processing of documents provided for possible inclusion on the Licensing Support Network (LSN). I have the overall responsibility for CACI's work on that project.

2. CACI maintained business records to track the documents that were collected and processed for DEN's production to the LSN. The data reported in this affidavit comes from those business records.

3. As a result of DEN's and CACI's efforts as described in the Certification Plans for Document Collection and Processing, a group of approximately 2.9 million documents was identified and processed for possible production as DEN's initial certification. This group of documents was obtained after excluding a large number of documents that were duplicative, that did not meet criteria of the May 5,2003 memorandum from the Office of General Counsel (Call Memo), or that were excludable by regulation.

4. The group of 2.9 million documents included: (i) approximately 1.3 million documents from DEN's Record Management System; (ii) approximately 850,000 paper and approximately 50,000 electronic documents submitted in response to the May 5, 2003 memorandum from the Office of General Counsel (Call Memo); and (iii) approximately 700,000 emails and attachments that project personnel identified as potentially relevant.

5. CACI followed the directions in DEN's Initial Certification Plan to identify which of these 2.9 million documents are documentary material. These instructions resulted in the identification of the approximately 2.1 million documents that were loaded onto DEN's participant server by June 30, 2004.

6. CACI processed certain documents received after April 15, 2004 in time for their inclusion with DEN's initial certification. CACI processed in time for the initial certification all the Records Management System feeds it received through May 22, 2004. CACI also processed in time for the initial certification all the paper documents that it received in response to the Call Memo through June 11, 2004.

7. CACI received after April 15, 2004 but did not process for the initial certification approximately 81,000 documents. CACI received 62,000 of these before June 30, 2004. It received the remaining 19,000 afterwards. The precise number of these documents will not be known until the processing is complete, but CACI's current estimate breaks down as follows: (i) 19,354 documents from the Records Management System; (ii) 1,040 paper documents submitted in response to the Call Memo; (iii) 34,750 efiles produced in response to the Call Memo (and not completely processed to eliminate duplicates); and (iv) 26,238 emails identified as potentially relevant by their authors.

INTENTIONALLY LEFT BLANK

1. BACKGROUND

Pursuant to the Nuclear Waste Policy Act of 1982 and the ensuing site recommendation approvals by the President and Congress, the U.S. Department of Energy (DOE) intends to apply for a license from the U.S. Nuclear Regulatory Commission (NRC) to construct a geologic repository for the storage of high-level radioactive waste at Yucca Mountain, Nevada. The Office of Civilian Radioactive Waste Management (OCRWM) is currently preparing a license application (LA) that will be submitted to the NRC. NRC regulation 10 CFR 2.1003 requires the DOE to make available in advance of submitting its LA certain basic licensing documents as well as “documentary material” in connection with the Licensing Support Network (LSN). Additionally, a DOE-designated official must certify, in accordance with 10 CFR 2.1009(b), that the DOE has established and implemented procedures to meet the requirements of 10 CFR 2.1003, and that, to the best of the official’s knowledge, the documentary material specified in 10 CFR 2.1003 has been identified and made electronically available. The DOE must provide an initial certification to this effect and an updated certification at the time the LA is submitted.

2. PURPOSE

The purpose of this document is to set forth the basis for the initial certification that (1) the DOE established procedures to implement the requirements in 10 CFR 2.1003, and (2) to the best of the certifying official’s knowledge, the documentary material specified in 10 CFR 2.1003 has been identified and made electronically available.

3. CERTIFICATION REQUIREMENTS

The LSN certification requirements are provided in the NRC regulations at 10 CFR 2.1009. The regulation contains two paragraphs, the first of which states:

- (a) Each potential party, interested governmental participant, or party shall:
 - (1) Designate an official who will be responsible for administration of its responsibility to provide electronic files of documentary material;
 - (2) Establish procedures to implement the requirements in § 2.1003;
 - (3) Provide training to its staff on the procedures for implementation of the responsibility to provide electronic files of documentary material;
 - (4)** Ensure that all documents carry the submitter’s unique identification number;
 - (5) Cooperate with the advisory review process established by the NRC under § 2.1011(d).

The second paragraph of 10 CFR 2.1009 states:

- (b) The responsible official designated under paragraph (a)(1) of this section shall certify to the Pre-License Application Presiding Officer that the procedures specified in paragraph (a)(2) of this section have been implemented, and that to the best of his or

her knowledge, the documentary material specified in § 2.1003 has been identified and made electronically available. The initial certification must be made at the time the participant is required to comply with § 2.1003. The responsible official for the DOE shall update this certification at the time the DOE submits the LA.

4. THE DOE'S PROCEDURES TO IMPLEMENT THE REQUIREMENTS OF 10 CFR 2.1003

As described below, the DOE established procedures to identify, collect, and process documents that might be potentially relevant to the Yucca Mountain proceeding. The DOE established additional procedures to identify and make electronically available from those documents, for purposes of its initial certification, the documents that comprise the documentary material called for under 10CFR 2.1003.

4.1 IDENTIFICATION AND COLLECTION OF DOCUMENTS

The DOE, aided by its Litigation Support Contractor, CACI, Inc., identified and collected potentially relevant documents in accordance with the *OCRWM Licensing Support Network Certification Plan for Document Collection* (DOE 2004a), including the procedures and training referenced therein. The DOE and CACI conducted compliance assurance reviews, as set forth in the *Office of Civilian Radioactive Waste Management Licensing Support Network Compliance Assurance Plan for Document Collection* (DOE 2004c), to provide added assurance that affected DOE and contractor offices identified, segregated, and provided appropriate documents for processing by CACI.

As a result of those efforts, the following collections of documents were identified. The documents in these various collections are, to a certain extent, duplicative:

- **The OCRWM Records Management System (RMS)**—In effect since 1987, the RMS is an integrated records program designed to collect, categorize, and maintain documents for the Yucca Mountain project. This includes a requirement to create and retain records packages for comments on draft technical work products circulated for comment, including comments transmitted via email. Affected DOE and contractor personnel are trained regarding the record-keeping requirements of the RMS, and audits and self-assessments are periodically performed to monitor compliance with those requirements. Deficiencies detected through those means are addressed and resolved through OCRWM's corrective action program.
- **Paper** collection—This collection consists of the paper documents identified and submitted to CACI in response to the May 5, 2003 memorandum from the Office of the General Counsel to affected DOE and contractor offices seeking potentially relevant documents (Call Memo) (Otis 2003).

This collection includes potential documentary material in the files of the employee concerns programs of OCRWM and Bechtel SAJC Company, LLC (BSC). All such documents were received, generated, or collected in connection with concerns raised with the OCRWM Concerns Program (and its predecessors) or the BSC Concerns

Programs. These files are protected under the Privacy Act of **1974**. Because of the confidential nature of these files, they were not made available to CACI for processing. Rather, the DOE provided CACI with information sufficient for CACI to create a bibliographic header for each employee concerns file containing potential documentary material and directed CACI to make the bibliographic header electronically available. The employee concerns files will be preserved and retained by the respective OCRWM and BSC concerns programs.

- **E-file** collection—This collection consists of documents on electronic media identified and submitted to CACI by affected DOE and contractor offices in response to the Call Memo. Included in this collection are electronic copies of the emails that persons submitted in response to the Call Memo. These emails were not limited to those authored by the person submitting the emails.
- **Legacy paper collection**—This collection consists of paper documents from the archived files of former DOE contractors for the Yucca Mountain Project.
- **Electronic** databases—This collection consists of server-based electronic databases maintained by the DOE management and operating contractor for the Yucca Mountain Project, BSC, and the DOE information technology contractor, RSIS.
- **OCRWM emails**—This collection consists of emails from OCRWM’s Lotus Notes email system designated by their authors as potentially relevant to the Yucca Mountain proceeding when the emails were sent. This collection is the result of an electronic template added to the OCRWM email system in February 2004.
- **Archival emails**—This collection consists of OCRWM email system back-up tapes that contain archival emails authored or received by current and former OCRWM personnel. These back-up tapes were not created as a supplement to the RMS or otherwise to be used in the normal course of OCRWM’s activities. Rather, they were created as a means of temporarily storing email data to guard against a catastrophic failure in OCRWM’s email systems. These back-up tapes would not have been saved indefinitely in the ordinary course, but these particular tapes were retained in connection with litigation involving the DOE. A small fraction of the OCRWM archival email was collected from other diverse sources. This includes a small group of archival emails retained in Foremost, which was an additional email retention system that was tested on some OCRWM systems for a limited period of time and that was never fully implemented across the Project.

4.2 PROCESSING OF DOCUMENTS

At the direction of the DOE, CACI processed the documents from the foregoing collections that were submitted to it as of **April 15, 2004** according to the *Office of Civilian Radioactive Waste Management Licensing Support Network Certification Plan for Document Processing* (DOE 2004b), including the procedures and training described in that plan. The cut-off date of April 15, 2004 was necessary for purposes of DOE’s initial certification because of the lead time necessary to process the large volume of documents consistent with the requirements of **NRC**

regulations and guidance. For purposes of the DOE's updated certification, CACI will continue to process documents generated or received after April 15, 2004.

As more particularly described in the document processing plan, CACI performed conformance reviews as part of its processing activities to determine whether the documents submitted from the paper, e-file, and legacy paper collections satisfied the criteria of the Call Memo. CACI also created electronic images and searchable full text of submitted documents (when appropriate) as well as bibliographic headers for the documents consistent with the LSN regulations. The DOE and CACI also conducted compliance assurance reviews, as set forth in the *Office of Civilian Radioactive Waste Management Licensing Support Network Compliance Assurance Plan for Document Processing* (DOE 2004d), to provide added assurance that the processing of documents was consistent with the regulatory requirements.

4.3 IDENTIFICATION OF DOCUMENTARY MATERIAL

The DOE directed **CACI** to identify the following documents from those that had been submitted to CACI for processing as of April 15, 2004 (and to the extent feasible, those submitted to and processed by CACI since April 15, 2004), and upon further notice by the DOE, to make those documents electronically available consistent with the LSN regulations:

- The following basic licensing documents: Yucca Mountain Site Characterization Plan; Yucca Mountain Environmental Impact Statement.
- From the RMS:
 - Documents that are referenced in the Document Input Reference System (DIRS) or the Technical Data Management System (TDMS). The DIRS is a database established in 1999 to identify and track the inputs to OCRWM's technical work products on the Yucca Mountain Project. The TDMS is a database that collects technical data generated by or on behalf of OCRWM in connection with the Yucca Mountain Project.
 - Documents in the RMS comprising the records packages associated with these documents that are referenced in the DIRS or TDMS (with the proviso that **CACI** was not directed to include documents in the records packages if their only document type code¹ is Package, Controlled Document Issuance, Position Description, Position Qualification Statement, Training Assignment Sheet, Training Attendance Record, Verification of Education, or Verification of Work Experience, because those categories of documents are not believed to contain information that would qualify the documents as documentary material).
 - Documents with one or more of the following document type codes: **AMR** (Analysis Model Report), Design, Plan, **PMR** (Process Model Report), Report, Requirement, Software, and Vendor and Supplier, along with the other documents in

¹ **A** code assigned to a category of documents, in the RMS, by OCRWM contractors.

the RMS comprising the records package associated with each such document (with the proviso that CACI was not directed to include documents in the records packages if their only document type code is Controlled Document Issuance, Package, Position Description, Position Qualification Statement, Training Assignment Sheet, Training Attendance Record, Verification of Education, or Verification of Work Experience, because those categories of documents are not believed to contain information that would qualify the documents as documentary material); however, CACI was authorized to exclude documents with a document type code of AMR, Design, Plan, PMR, Report, or Requirement if a title review indicates that the documents concern a topic outside the draft *Topical Guidelines for the Licensing Support Network* (NRC 2002) or otherwise can be excluded from the LSN pursuant to regulation.

- Documents with one or more of the following document type codes: Audit, Calibration, Correspondence (except for congressional correspondence as permitted by 10CFR 2.1005(i)), Data, Email, Job Package, Notebook, Policy (final versions), Procedure or Instruction (final versions), Publication, Self-Assessment, and TDIF (Technical Data Information Form); however, CACI was authorized to exclude documents with a document type code of Audit, Data, Email, Job Package, Notebook, Policy, Procedure or Instruction, Publication, or Self-Assessment if a title review indicates that the documents concern a topic outside the draft *Topical Guidelines for the Licensing Support Network* (NRC 2002) or otherwise can be excluded from the LSN pursuant to regulation.
- The contracts for the DOE's three management and operating contractors for the Yucca Mountain project.
- Documents with one or more of the following document type codes to the extent they are (1) referenced in DIRS or TDMS, (2) cross-coded with one of the document type codes above, or (3) included in a records package selected for inclusion with a document type code of Administration, Agreement, Change Control, Computer Documentation, Drawing, Legal, Map, Order or Directive, Package, Permit, Procurement, Qualification Records, Review, and Self-Study.
- Documents with "errata" in the title, except that CACI was authorized to exclude such a document if a title review indicates that it concerns a topic outside the draft *Topical Guidelines for the Licensing Support Network* (NRC 2002) or otherwise can be excluded from the LSN pursuant to regulation.
- For any document to be made available from the RMS pursuant to one of the foregoing criteria, any other document in the RMS that is identified as a related document in the bibliographic header with one or more of the following codes: CQR (corrects); COR-BY (corrected by); DUP (duplicate); PARTS; PART-OF; SUPR (supersedes); SUPR-BY (superseded by); SUPL (supplements); and SUPL-BY (supplemented by).

- From the paper documents produced in response to the Call Memo and legacy paper:
 - Documents with one or more of the following paper document type codes²: Data, Email, Meeting Aid, Notebook, and Report; however, CACI was authorized to exclude such a document if a title review indicates that it concerns a topic outside the draft *Topical Guidelines for the Licensing Support Network* (NRC 2002) or otherwise can be excluded from the LSN pursuant to regulation.
 - Documents with a paper document type code of Correspondence (except for congressional correspondence as permitted by 10CFR 2.1005(i)).
 - Documents with one or more of the following paper document type codes to the extent they are cross-coded with one of the paper document type codes otherwise being produced: Drawing, Financial Statement, Form, Legal Document, List, Manual, Map, Media, Photograph, or Procurement.
 - Bibliographic header for the employee concerns files determined to contain potential documentary material.
- From the e-files:
 - All documents, including the emails that were submitted as e-files in response to the Call Memo.
- From the databases:
 - A bibliographic header only for each database identified as containing potential documentary material.
- From the OCRWM emails:
 - Emails identified as potentially relevant through the contemporaneous author-review process.
- From the archival emails:
 - Emails identified as potentially relevant through the current user review process that OCRWM implemented for purposes of identifying emails from the back-up tapes for potential inclusion on the LSN.

Pursuant to 10 CFR 2.1003, the DOE further instructed CACI to make available a bibliographic header only for any document identified for inclusion that has been designated as privileged, or that otherwise can be produced in header-only format pursuant to the LSN regulations.

² A code assigned to a category of documents by CACI.

The identification of certain documents as privileged was based solely on computer software screening protocols. The DOE is reviewing these designations.

4.4 CACI CERTIFICATION

CACI will certify to the DOE certifying official when it has identified the documents outlined in Section 4.3 and that CACI is ready to make those documents electronically available upon notice by the DOE certifying official (Appendix A). Following notice by the DOE certifying official to make those documents electronically available (Appendix B), CACI will certify to the DOE certifying official when the documents have been made electronically available (Appendix C).

5. BASIS FOR INITIAL CERTIFICATION

The procedures referenced above, and the resulting certifications, provide the basis for the DOE certifying official to certify that (1) the DOE has implemented procedures required by 10 CFR 2.1009(a)(2), and (2) to the best of the certifying official's knowledge, certain basic licensing documents as well as the three categories of documentary material specified in 10CFR 2.1003 and submitted to CACI by April 15, 2004, have been identified and made electronically available (Appendix D). These procedures create a reasonable basis for that belief because:

- **Category 1**—The documents that **CACI** has been instructed to make available are reasonably calculated to encompass the information from the documents processed by CACI that the DOE intends to cite or rely on in support of its LA (although the LA is not yet complete, additional information will be developed, new documents will be created, and existing ones revised).
- **Category 2**—The documents that CACI has been instructed to make available are reasonably calculated to encompass the information that the DOE knows of and has in its possession, or that the DOE has developed, but does not support the information the DOE intends to cite or rely on in support of the LA. The OCRWM Program has procedures for obtaining comments on technical products, resolving comments on technical work products, registering and resolving non-concurrences with technical work products, addressing employee concerns, and retaining records for all of these. The documents identified for production from RMS should capture these records. Additionally, the DOE is making available several hundred thousand paper and electronic documents that were identified in response to the Call Memo. The Call Memo directed production of documents regardless of whether their contents were supporting or non-supporting.
- **Category 3**—The documents that CACI has been instructed to make available are reasonably calculated to encompass the reports and studies that the DOE prepared or that were prepared on its behalf, and that are relevant to the LA and the issues set forth in the draft *Topical Guidelines for the Licensing Support Network (NRC 2002)*.

In addition, the DOE is making available the archival emails identified as potentially relevant through the current user review process. The NRC has stated in 53 HR 44414 that "DOE will not

be expected to make an exhaustive search of its archival material that conceivably might be within the topical guidelines but has not been reviewed or consulted in any way in connection with DOE's work on its license application." Nevertheless, the DOE decided to make available the archival emails identified through the current user review process. That review process did not include a small fraction of active users' archival emails that posed technological difficulties in processing (i.e., encrypted emails and emails on the Foremost system) or emails authored by a small number of active users who were unavailable for the review process (e.g., the user was on medical leave).

The DOE has not undertaken *to review* or produce for its initial certification the collection of archival emails that were authored by persons other than active users (i.e., persons who had accounts on OCRWM's email system at the time of the email review process). The archival back-up tapes are an indiscriminate snapshot of the OCRWM email system on a given day and contain all manner of email unrelated to Yucca Mountain, including personal emails with privacy protected information, and are not coded or arranged by content. Further, the DOE does not intend to cite or rely on archival emails in support of its LA, and the emails would not appear to qualify as reports and studies. Given OCRWM's record-keeping procedures, the number of documents, including emails, being produced from the other document collections, and the experience of the current user review, only an extremely small number, if any, of archival emails in this group might contain non-supporting information not reflected in the other documents the DOE is producing. The "rule of reason" that the NRC has said "must be applied" to an LSN participant's obligation to identify documentary material. 53 FR 444 14, does not require the DOE to review and produce this archival collection in light of (1) the extraordinary expenditure of public funds that would be required to process and review these emails authored by persons other than active users, (2) the extremely low percentage of these emails that might be considered even potentially relevant to the Yucca Mountain licensing (based on the active user email review), (3) the number of documents from other collections that are being produced (including emails authored by former DOE personnel), and (4) the otherwise marginal utility of the archival email collection.

6. PROCEDURES FOR SUPPLEMENTAL PRODUCTIONS AND UPDATED CERTIFICATION

As set forth in the *OCRWM Licensing Support Network Certification Plan for Document Collection* (DOE 2004a) and the *Office of Civilian Radioactive Waste Management Licensing Support Network Certification Plan for Document Processing* (DOE 2004b), the DOE's collection, processing, and review efforts will continue for documents identified after April 15, 2004. Any documentary material identified as a result of those efforts will be made available as required by LSN regulations.

APPENDIX A

CACI, INC. CERTIFICATION OF DOCUMENT IDENTIFICATION FOR LSN

Pursuant to the Office of Civilian Radioactive Waste Management Licensing Support Network Certification Plan for Initial Certification (OGRWM, June 2004) (“OCRWM Certification Plan”), I hereby certify that the documents identified in Section 4.3 of the OCRWM Certification Plan that were submitted to CACI, Inc. by April 15, 2004, have been processed by CACI, Inc. and loaded on the DOE Licensing Support Network server. These documents are ready to be accessed by the U. S. Nuclear Regulatory Commission and made available on the World Wide Web.

Mr. Joseph D. Ziegler
Acting Director
Office of License Application and Strategy
U.S. Department of Energy
P.O. Box 364629
North Las Vegas, Nevada 89036-8629

RE: Update on DOE Document Volume Estimates for Licensing Support Network

Dear Mr. Ziegler:

First of all, I would like to thank you for the comments submitted on the draft revision to the Licensing Support Network (LSN) guidelines for OCR accuracy and to let you know that DOE comments are being given thoughtful attention.

Attached is a summary document presented to the Licensing Support Network Advisory Review Panel (LSNARP) at its October 13, 1999 meeting. It summarizes information provided to NRC's Licensing Support Network Administrator in response to a survey of all parties, potential parties and interested governmental entities to be used in sizing the Licensing Support Network (LSN) system. You will note that estimates submitted by Claudia Newbury in September 1999 indicate an expected DOE document collection of 10,000 documents comprised of 100,000 pages of textual material (DOE information is listed in column F, and the information on document and page estimates will be found on the lines marked 7.9 and 7.h). These estimates were used to size the LSN portal server and software which was subsequently developed by NRC and operationally made available on October 18, 2001. Based on this 1999 information, the current LSN portal configuration is sized to a high-end maximum volume of 15 million pages.

As we get closer to the point in time where NRC must have the LSN operational in order to service parties in their compliance efforts, one of our great concerns is that the LSN database sizing assumptions will be exceeded during our fiscal year project execution, thereby introducing a constraint on the parties' ability to timely comply with the requirements of 10 C.F.R. Part 2, Subpart J. At the same time, we are in the early stages of planning and assessment for a final cycle of technology refreshment for the LSN platform and software. We therefore ask you to review the 1999 DOE estimates and provide us with any revisions, as appropriate, based on your current planning basis for LSN document availability, including both volume and approximate timing.

I am certain that you can appreciate the importance of thoughtful advance planning and accurate information to ensuring that the LSN fulfills its mission in support of a potential construction authorization application for the High Level Waste repository. As we are currently

active in budget formulation for Fiscal Years 2004 through 2006, a response no later than April 7, 2003 would **be** greatly appreciated.

If you have any questions, please contact Mr. Matthew Schmit at 301-415-7469 or via e-mail at MRS3@NRC.GOV. Your update information may be sent to me via e-mail at DJG2@NRC.GOV or may be mailed to my attention at:

U.S. Nuclear Regulatory Commission
Atomic Safety & Licensing Board Panel
Mail Stop T3-F23
Washington, DC 20555-0001

Once again, thank you for your assistance in our planning efforts. We will be following up this electronic communication with a paper record.

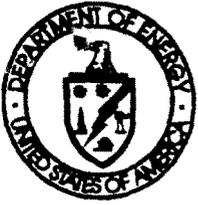

Sincerely,

Daniel J. Graser
Licensing Support Network Administrator

REVIEW OF 1999 U.S. DEPARTMENT OF ENERGY (DOE) ESTIMATES BASED ON CURRENT PLANNING FOR LICENSING SUPPORT NETWORK (LSN) DOCUMENT AVAILABILITY

Reference: Ltr, Graser to Ziegler, dtd 3/28/03

In the referenced letter, you requested a review of the 1999 DOE estimates of the DOE LSN participant website. While, at this time, we are still reviewing our document collection, it is estimated that, at initial certification, the DOE LSN participant website will contain approximately 3,000,000-4,000,000 documents composed of 27,500,000-36,500,000 pages. The majority of pages will be "tif" images averaging 50KB per page, one page per file. There will be an additional 3,000,000-4,000,000 "xml" files (one per document) and 3,000,000-4,000,000 "html" files (also one per document).

You also requested timing information related to the DOE LSN participant website. The DOE has recently contracted with CACI, Inc. to perform services related to loading and operating DOE's LSN website. At this time, DOE is evaluating when the website will be electronically available.

If you have any questions concerning these comments, please contact Harry E. Leake at (702) 794-1457 or Sheryl A. Morris at (702) 794-5487.

Joseph D. Ziegler, Acting Director
Office of License Application and Strategy

1 term to allow us to set up the administrative processes to
2 make those determinations.

3 MR. MURPHY: You know I wouldn't even limit it
4 to a university library. Community library, you know --

5 MS. NEWBURY: But they're not likely to have
6 as many things.

7 MR. MURPHY: Well, but they may have some
8 stuff that the university library doesn't have. I mean I
9 don't know, hell, I'm not a librarian, what do I know.
10 All I'm saying is that if, you know, I think if you can go
11 and get it within a reasonable period of time from some
12 library, public library somewhere, it's not squirreled
13 away in some philanthropist's basement --

14 MR. WARRINER: Or at interlibrary loan.

15 MR. MURPHY: Huh?

16 MR. WARRINER: Or you could use the
17 interlibrary loan system.

18 MR. GRASER: Yeah. Dan Graser from NRC, if I
19 could make a simple recommendation. If the document is to
20 be found in the OCLC or any other standard bibliographic
21 database that you could access through an interlibrary
22 loan, then exclude the document. If it's in OCLC then
23 it's generally available through some sort of interlibrary
24 loan.

25 MR. SILBERG: What do those initials --

1 MR. GRASER: Ohio College Library Center. It
2 includes a large majority of government libraries,
3 educational libraries, local public library systems. It
4 has cataloging for millions and millions of records.

5 MR. CAMERON: I take it this is only -- this
6 only applies -- there could be a reference in a contractor
7 report to another technical study, okay. We're only
8 talking about journal articles here, right?

9 MS. STOTLER: We're only talking about the
10 stuff that is not produced by OCRWM. I mean stuff
11 produced by OCRWM will go in by an --

12 MR. CAMERON: Yeah.

13 MS. STOTLER: -- program will have to go in
14 anyway.

15 MR. WARRINER: If they would cite --

16 MS. STOTLER: Our own reports.

17 MR. CAMERON: Yeah, right.

18 MR. WARRINER: If they would cite a report
19 that OCRWM generated that would be in the record system
20 because that's an OCRWM record.

21 MR. CAMERON: What if it's a report that's
22 generated by someone else?

23 MR. MURPHY: How about the Savannah River
24 Laboratory?

25 MR. CAMERON: Yeah, well, there's a good

1 technical options, and see what other possibilities
2 exist for producing such an index in a more
3 expeditious fashion than crawling over the internet.

4 And certainly just as the DOE has participated
5 in testing in the past, they could participate in
6 helping the NRC deal with this issue.

7 MR. GRASER: Well, thank you for your
8 observations, Harry. Back to the presentation. In
9 terms of the administrative module which we use for
10 monitoring the audit process of the system, that has
11 been revised to add additional security for our
12 audit staff to review the results of the Spidering
13 process.

14 And it reflects one of the security
15 recommendations from the NSA task force last year,
16 insofar as although the audit process is transacted
17 across the internet communications channels, it does
18 now require a CD-resident client side component to
19 activate all of the audit and administrative
20 features as a security feature that has been added.

21 In terms of training, I have some things to
22 report on the overall training activities. We have
23 now been scheduled to participate in a workshop in
24 November of 2003 at the Nevada State Librarian and
25 Archivists Meeting in Lake Tahoe.

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS
1323 RHODE ISLAND AVE., N.W.
WASHINGTON, D.C. 20005-3701

1 We will be sending representatives there
2 provide State librarians an opportunity to see the
3 LSN software and to work with our staff in terms of
4 just familiarizing them with how the system works,
5 and responding to the typical sorts of questions
6 that the general public may have if they choose to
7 come into one of the Nevada libraries and access the
8 LSN via the internet terminals that are available in
9 all of the State libraries.

10 We will also provide the librarians with the
11 training tools, the same training tools that we
12 would make available to the parties. Training tools
13 will include a Quick Start reference sheet, kind of
14 a dummy sheet for people to have right close
15 available to the terminal that they happen to be
16 using.

17 And we will provide them quick start and short
18 cut tips and pointers sorts of information. We will
19 leave behind copies of CD-ROM tutorials and will
20 also leave behind a supply of the LSN brochures that
21 can be made available in the libraries.

22 And those brochures would be similar to the
23 brochures that we brought along and have a supply,
24 and have them available at the table in the back of
25 the room here.

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS
1323 RHODE ISLAND AVE., N.W.
WASHINGTON, D.C. 20005-3701

1 Those are the same sorts of things that we
2 would make available as part of our outreach to all
3 the parties, and providing training to the parties
4 and potential parties.

5 And as parties are approaching the point **of**
6 making their document collection available, I would
7 urge that anybody that wants to engage us to come
8 out and do training with a core group of users at
9 your organization, we will be more than happy to do
10 that.

11 That will involve a certain amount of
12 scheduling and coordination to set up a mutually
13 convenient time frame to do that. But we are
14 willing to come out to wherever the organization is
15 located and as I said, train a core group of
16 individuals on how to use the system, and provide
17 copies of the tutorials and quick start reference
18 materials that they can then take and circulate
19 around the organization.

20 My next chart is addressing my understanding
21 of the current sizing projections based on the
22 information that has been made available to me. At
23 this point in time, the size of the NRC collection
24 is estimated to top at approximately 35,000
25 documents, roughly 800,000 pages of material.

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS
1323 RHODE ISLAND AVE., N.W.
WASHINGTON, D.C. 20005-3701

1 The Department of Energy, based on
2 communication that I received in the month of March
3 from the Department of Energy, they have low-end and
4 high-end estimates ranging from 3-to-4 million
5 documents, comprised of 27-1/2 to 36-1/2 million
6 pages of content.

7 For Nevada, I am still operating on the
8 information provided in the 1999 survey, zero
9 documents and zero pages. Nye County, I am still
10 counting, and again the information from the 1999
11 survey, a thousand documents, and a thousand pages.

12 The other parties, the other counties
13 combined, a thousand documents, roughly 10,000
14 pages. This represents information that was
15 solicited as part of the LSN original design
16 activities in the fall of 1999.

17 Anybody who would like to update and provide
18 additional information, I would be most
19 appreciative. It helps me with my planning and
20 sizing activities.

21 The total range for the system right now is
22 ranging between 3,037,000 documents, to 4,037,000
23 documents; and 28,316,000 to 37,316,000 pages of
24 material.

25 As I mentioned earlier the current system is

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS
1323 RHODE ISLAND AVE., N.W.
WASHINGTON, D.C. 20005-3701

1 sized for roughly one million documents, 15 million
2 pages. Therefore, in the past couple of months our
3 staff has initiated an effort to do some planning
4 for growing the system to accommodate any of these
5 potential volumes of materials.

6 We have already gone before the NRC's
7 budgeting process and the budgeting organization and
8 group that goes through and starts, and we are doing
9 the fiscal year 2005 budget drill right now.

10 And as part of the presentation on the FY 2005
11 drill, we did do an issue paper identifying a
12 potential need to scale the system from 15 million
13 to 45 million pages, and we have identified that
14 that is a financial fiscal need that is going to
15 show up sooner than fiscal year '05, which is our
16 planning year that we are going through a drill for
17 right now.

18 And the Agency is in the process of trying to
19 identify a funding plan that would provide us
20 earlier availability to some funds that we can use,
21 and hopefully even in Fiscal Year 2003, with some
22 residual funds this year, and also Fiscal Year 2004,
23 that would allow us to triple the capacity, and
24 bring us to about 45 million pages worth of material
25 capacity.

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS
1323 RHODE ISLAND AVE., N.W.
WASHINGTON, D.C. 20005-3701

1 And we are targeting that contingent on the
2 availability of funds, and we would be able to have
3 the system expanded sometime towards the end of the
4 calendar year, and the early part of the calendar
5 year next year.

6 MR. MCCOLLUM: Dan, Rod McCollum, NEI. When
7 you talk about increasing the capacity from 15 to
8 45, you get a corresponding increase in the speed of
9 the crawler with this?

10 MR. GRASER: Well, that is the second bullet.
11 We are going to focus our efforts on further
12 enhancing the speed of the crawler. In response to
13 one of your earlier questions, part of the effort in
14 scaling the system up is to build multiple instances
15 of the search engine and multiple server devices.

16 So we would be taking our current architecture
17 and expanding or changing the architecture to
18 accommodate multiple servers and multiple search
19 engines, and then mirror those multiple search
20 engines so that we had both the public access site
21 and the priority access site.

22 So part of the effort to jump us past the 15
23 million page threshold is going to involve some
24 reorganization of the platforms and the server
25 configurations, getting additional instances of the

1 participants would identify. So I think you have to
2 take all those things together, and it may totally
3 cancel out each other, or it may only make the
4 increase more modest. So that's something to give
5 thought to, too, in whatever comments you raise on
6 that point.

7 MR. LEAKE: I understand. It may well not
8 turn out to be a problem. It's just that there is a
9 certain uncertainty factor there. But your comments
10 are noted.

11 MR. LINEHAN: I just wanted to follow up
12 on the comment you made earlier, Harry, when you were
13 talking about the capacity of the system, Were you
14 inferring that even without going into the hearing and
15 later discovery, that the DOE collection could be
16 greater than four million? I wasn't quite sure what
17 you were saying.

18 MR. LEAKE: The DOE is still in the
19 process of executing its plan for preparing its LSN
20 materials. The information we've provided previously
21 was our best estimate. We have -- at this time, our
22 estimates still fall within that range. But it is not
23 outside the realm of possibility that we will have to
24 come back and revise that estimate at a future time.
25 And as soon as we had a basis for that, we would do so

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS

WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

1 to maximize your ability to respond. But what we've
2 provided was an estimate, and we are in the act of
3 going through a large quantity of material and doing
4 these tasks.

5 MR. LINEHAN: You know, I think as early
6 as DOE can get back to us, because, you know, as Dan
7 indicated, the increase that we became aware of -- I
8 don't know if it was within the last year or what the
9 time frame was -- created a tremendous burden on the
10 agency because we have nuclear waste fund money that
11 supports Dan's activities and the technical
12 activities, and we're required to take money from
13 places, you know, where we really need to be spending
14 it to get ready for the hearing. You know, the sooner
15 we know -- I mean, hopefully there will not be an
16 increase -- but the sooner we know, the better it will
17 be for us to be able to decide how we can deal with
18 it.

19 The only thing that bothers me is I've
20 heard in the June meeting and this meeting that, you
21 know, it takes a while to go through these documents.
22 Everyone has known for years that the documents were
23 out there. You know, we had versions of the Reg.
24 Guide out there. You know, it's not something that
25 has just come up all of a sudden. What's frustrating

NEAL R. GROSS

COURT REPORTERS AND TRANSCRIBERS

WASHINGTON, D.C. 20005-3701

(202) 234-4433

www.nealrgross.com

1 to us is the fact that folks don't have a handle on
2 it, and it's putting us in this budget position -- or
3 budget execution position, which is causing problems
4 within the agency trying to deal with this.

5 MR. MURPHY: Harry, is it possible that
6 you might revise your estimate downward as well as
7 upward? I mean, it seems to me that your upper end of
8 four mill- -- or both the three and the four million
9 may be based on some fairly conservative interpre-
10 tations **of** the definition of "documentary material"
11 and your requirements under 1003. I mean, I think
12 it's maybe not likely, but possible that, upon further
13 analysis, DOE might conclude that they don't really
14 have four million documents to post, they have two and
15 a half.

16 MR. LEAKE: And that is quite possible.

17 MR. MURPHY: I mean, am I right about
18 that?

19 MR. LEAKE: It is possible.

20 MR. MURPHY: It could go down as well as
21 up.

22 MR. LEAKE: That is possible.

23 MR. GRASER: I do want to thank you all
24 for that update. And if I can just take this
25 opportunity to raise just -- or not so much raise an

AGREEMENT FOR TRANSFER OF RESPONSIBILITIES

Enclosed are originals of the *Agreement for Transfer of Responsibilities Among Bechtel SAIC Company, LLC, TRW Environmental Safety Systems, Inc., and the U.S. Department of Energy*, along with originals of my March 29, 2001, letter of the same subject. **The** originals enclosed **should be** retained by your respective companies.

Thank you for your assistance in executing these documents in a timely manner.

Jerri J. Adams
Contracting Officer

Enclosures:
As stated

**AGREEMENT FOR
TRANSFER OF RESPONSIBILITIES**

**Among Bechtel SAIC Company, LLC,
TRW Environmental Safety Systems, Inc.,
and the U.S. Department of Energy**

**REGARDING TRANSITION OF
MANAGEMENT AND OPERATIONS SERVICES FOR THE DEPARTMENT OF ENERGY CIVILIAN
RADIOACTIVE WASTE MANAGEMENT PROGRAM**

THIS TRANSFER AGREEMENT (Agreement) is entered into by and among the **UNITED STATES OF AMERICA**, acting through the United States Department of Energy (DOE), represented by the undersigned Manager; Bechtel SAIC Company, LLC (BSC), a limited liability company organized under the laws of the **State** of Delaware; and TRW Environmental Safety Systems, Inc. (TESS), which is a wholly-owned **subsidiary** of TRW inc. (TRW), and a corporation organized and existing under the laws of the State of Delaware. **DOE**, BSC, and TESS are referred to in this Agreement collectively as the Parties, and each individually as a Party. .

WHEREAS DOE and TESS are parties to Contract No. DE-AC08-91RW00134 (hereinafter referred to as the TESS Contract), pursuant to which TESS has responsibilities for management and operation for the DOE's Office of Civilian Radioactive Waste Management (OCRWM) Program, which responsibilities expire February 11, 2001; and,

WHEREAS the DOE and BSC are parties to Contract No. DE-AC08-01NV12101 (hereinafter referred to as the BSC Contract), which provides for BSC to commence its management and operating responsibilities for OCRWM beginning February 12, 2001; and,

WHEREAS the Parties desire to facilitate an orderly transfer of responsibility for the OCRWM management and operations, and for the documents, agreements, and property referred to in this Agreement;

NOW, THEREFORE, in consideration of the mutual covenants and understandings contained herein the Parties agree as follows:

1 PURPOSE

The purpose of this Agreement is to ensure an orderly transfer to **BSC** of management and operating activities performed by **TESS** under the **TESS** Contract. Upon transfer of such activities, **BSC** shall perform its responsibilities in accordance with the terms of the BSC Contract. The Parties agree that this Agreement supplements the **BSC** Contract and the TESS Contract, but does not otherwise modify their respective rights, responsibilities, obligations, and duties established under either the **TESS** Contract or the BSC Contract, and in the event of a conflict between the **terms** of this Agreement and the terms of either the TESS Contract or the BSC Contract, the terms of such contract shall prevail. **TESS** shall be authorized to perform necessary post-transition closeout activities pursuant to subarticle 7.P below.

2. TRANSITION DATE

The "Transition Date" is February 12, 2001.

3. ASSIGNMENT OF SUBCONTRACTS, PURCHASE ORDERS, AND OTHER AGREEMENTS

DOE hereby directs **TESS**, and **TESS** hereby transfers and assigns to BSC, as of the Transition Date, all of TESS' obligations, rights, title, and interest in and to all contractual agreements, existing as of the ~~TransAgmtR~~

Transition Date, entered into by **TESS** under the **TESS** Contract with entities other than the Parties or their affiliates. This assignment includes, **but is not limited to**, purchase orders, subcontracts, memorandum purchase orders, requests for services, requests for proposals or other solicitations. **Work For Others** agreements, Cooperative Research And Development Agreements (CRADAs), leases for real or personal **property**, licenses for use of third party Software, confidentiality agreements, nondisclosure agreements, collective bargaining agreements, and all unexpired warranties. **BSC** hereby accepts' such assignment *in* accordance with the terms of the **BSC** Contract. This article does not apply to any such contractual agreement for which any of the costs are unallowable under the **TESS** Contract.

On or before the Transition Date, **TESS** shall deliver to **BSC** any third party notices or consents required *in* connection **with** the assignment of agreements in the above paragraph.

4. ASSIGNMENT AND TRANSFER OF INTELLECTUAL PROPERTY

- A. **DOE** hereby directs **TESS**, and **TESS** hereby transfers and assigns to **BSC**, effective as of the Transition **Date**, all rights, title, interest, and obligations relating to intellectual property and intellectual property-related contractual arrangements, as these terms are defined below, and **BSC** hereby accepts the transfer and assignment of all such rights, title, interest, and obligations.
- B. The intellectual property subject to this transfer and assignment includes a? Intellectual property that **TESS** has generated or acquired pursuant to the terms of the **TESS** Contract, whether jointly or solely owned, including, but not limited to, intellectual property that **arises** under or relates to the **work** scope'of the **TESS** Contract.
- C. For purposes of this provision, "intellectual property" means **all** forms of intellectual **property** whatsoever, including, **but not limited to**, inventions and invention disclosures (whether or not patentable); **U.S.** 2nd corresponding foreign patent applications and patents, and any registrations, divisions, continuations, continuations-in-part, reissues, reexaminations or extensions of same; technical notebooks; proprietary information of a technical nature: mask works; **software**; and registered and unregistered copyrights, trademarks, and service marks.
- D. For purposes of this provision, "intellectual property-related contractual arrangements" includes, but is not limited to, Cooperative Research And Development Agreements (CRADAs), Work-for-Others (**WFO**) agreements, facility user agreements, material transfer agreements, bailment agreements, proprietary information agreements (PIAs) and underlying information disclosed pursuant to such agreements, non-disclosure agreements (NDAs), licenses, option agreements, beta site agreements, and Early access agreements, subcontracts, including all files, records, and other information related to such intellectual property-related contractual arrangements.

5. TRANSFER OF AND ACCESS TO RECORDS, DOCUMENTS AND DATABASES

- A. **DOE** hereby directs **TESS**, and **TESS** hereby transfers and assigns to **BSC**, effective as of the Transition Date, the custody Of all Government-owned records as that term **B** defined in **DEAR** Clause 970.5204-79, entitled Access to and Ownership of Records (Jun 1997). (which is incorporated in both the **TESS** and **BSC** contracts), and **BSC** hereby accepts such assignment. **TESS** hereby assigns to **BSC**, effective as of the Transition Date, the custody of all contractor-owned records that are transferred to **BSC**, including **but not limited to** financial and accounting records, and employment-related records for the employees that have accepted offers from **BSC**, and **BSC** hereby accepts such assignment.
- B. The **Parties** agree that the term "records" as used in subarticle 5.A, shall include but not be limited to **all** documents and information including writings, drawings, graphs, charts, photographs, microfilm or microfiche, or data compilations/databases, whether stored on computers, file servers on computer networks, magnetic or optical media, or any other storage devices from which information **may** be obtained or translated, that are in the care, custody or

control of **TESS** or its affiliates which were acquired or generated pursuant to the performance of the TESS Contract. The Term "records" does not include documents or records generated by TESS after February 11, 2001, or contractor-owned records (as that term is defined in DEAR Clause 970.5204-79) that are not transferred to **BSC**, including, but not limited to the personnel files of employees that have not accepted offers with **BSC**.

- C. TESS reserves the right to reasonable direct access to and inspection of all records transferred and/or assigned under this provision, including historical operating records, and the data from the CostPoint DOEFIMS accounting system which may be needed to close actions that may remain open or be opened subsequent to the Transition Date. BSC agrees to maintain reasonable and adequate custody of such records throughout the term of its contract.
- D. TESS reserves the right to claim privilege for documents that contain **TESS** confidential, proprietary, attorney work product, or attorney-client privileged information, except that any rights of privilege that **TESS** has in the following Documents are transferred and assigned to DOE and BSC: (1) Documents contained in a Privacy Act system of records maintained for the Government by TESS, (2) Documents related to litigation or claims, contracts, agreements, or matters transferred to BSC under the terms of this Agreement, or (3) any confidential or proprietary information accepted by TESS under proprietary information agreements. This privilege is only intended to extend to those types of information that are of a corporate confidential nature and not otherwise related to those matters or operations transferred under the terms of this Agreement to BSC. If BSC and TESS have a common or joint interest in the prosecution or defense of any claim, they agree to execute appropriate documentation to share otherwise-privileged information while protecting any attorney-client, attorney work product, or other privilege.
- E. DOE hereby directs **BSC**, and BSC agrees that it will provide reasonable direct access to TESS or its designees to any record (as described in 5.A, 5.B, and 5.C, above) under its control related to any matter, or thing, as soon as reasonably possible after request, and shall provide reasonable direct access to its employees and records, for interviews, depositions, hearings, etc., during regular business hours, on reasonable notice and request. Payments for the cost of retrieving and copying records will be determined on a case-by-case basis by the Parties. "Reasonable direct access" to such records and employees shall depend on (i) all relevant circumstances at the time of the request including, without limitation, the employee's job responsibilities and requirements of the BSC Contract, and (ii) the number and gravity of such requests. When the estimated level of effort is expected to be material TESS will provide an estimate of the level of effort expected from BSC in support of this subarticle 5.E.
- F. DOE hereby directs TESS, and TESS agrees that it will provide reasonable direct access to BSC or its designees to any record (as described in 5.D, above) retained under its control related to any matter, or thing, except as specifically exempted from access in this Agreement, as soon as reasonably possible after request, and shall provide reasonable direct access to its employees and records, for interviews, depositions, hearings, etc., during regular business hours, on reasonable notice and request. Payments to TESS for the cost of retrieving and copying records will be determined on a case-by-case basis by the Parties. "Reasonable direct access" to such records and employees shall depend on (i) all relevant circumstances at the time of the request including without limitation, the employee's job responsibilities and (ii) the number and gravity of such requests. When the estimated level of effort is expected to be material, BSC will provide an estimate of the level of effort expected from TESS in support of this subarticle 5F.
- G. In order to comply with various federal laws and internal procedures, TESS may require access to the records being transferred and assigned until, at a minimum, the end of 2009. In the event of the discontinuation of the BSC contract due to DOE's failure to exercise the contract option, program and/or contract termination or cancellation or for some other reason, TRW/TESS shall continue to have direct access to the records being hereby transferred and/or assigned from DOE or its designee (e.g., a successor contractor) until the end of 2009 at a minimum.

- H. The parties acknowledge that federal law requires medical records on personnel who have worked on the project, including, but not limited to, industrial hygiene sampling records, radiation safety records, pre-placement health records, to be maintained in a DOE repository for 75 years TESS, and its parent company. TRW, reserve the right to reasonable access to and inspection of all such medical records as they may be needed in the future to handle any claim or matter that arises out of TESS' performance of the TESS Contract.

6. TRANSFER OF CLASSIFIED DOCUMENTS

DOE hereby directs TESS, and on the Transition Date, TESS shall transfer the care, **custody**, and *control* of all classified documents to BSC, and BSC shall accept the care, custody, and control of said classified documents in accordance with the terms and conditions of the **BSC Contract**.

7. FINANCIAL ADMINISTRATION

Note: This section applies to all financial records and administration for **TESS as M&O contractor for DOE**, but does not apply to any contractual agreement for which any of the costs are unallowable under the TESS Contract, or any TESS corporate records, assets, or transactions.

A. Payroll

- (i) The final pay date for TESS employees is February 9, 2001 for salaries earned through February 11, 2001; this payroll will be processed and paid **by TESS**.
- (ii) (a) Internal Revenue Service Procedure 96-60 provides for standard and alternate procedures for filing Form W-2 under a "successor-predecessor" relationship. TESS and BSC agree to comply with Internal Revenue Procedure 96-60, Section 5, "Standard Procedure". The standard procedure requires that the predecessor employer (i.e., TESS) file all Forms 941, Forms W-2, and related tax filings until final wage and salary payments cease.
- (b) **As stated by IRS Revenue Procedure 96-60, Standard Procedure, TESS (or its designee) will be responsible for completing and filing various Federal and State tax forms (as applicable) for wages paid and taxes withheld for TESS employees. This includes payments made to all TESS employees through the date of transfer as specified in item 7.A(i)(a) above and final payments to TESS employees terminating on or before February 11, 2001. TESS will be responsible for at least the following Calendar Year (CY) 2001 tax forms:**
- **Form 941 Quarterly tax reports;**
 - **CY 2001 Form 940;**
 - **CY 2001 Forms W-2 and related transmittals;**
 - **Forms 1099 MISC and 1099R for deceased employees and related 1096 transmittals;**
 - **CY 2001 Social Security Administration (SSA) Magnetic Media, and**
 - **All related state and local reports and tapes.**
- (iii) To the extent permitted **under applicable law, BSC, as successor, will recognize employee FICA earnings and deductions and employer FICA, Federal Unemployment Tax, and State Unemployment Tax payments made by TESS for TESS employees who become employed by BSC on the Transition Date in determining FICA taxable earnings, FICA withholding, and FICA/FUTA/SUTA payments for the balance of the calendar year, TESS agrees to provide BSC with such information and documentation as needed to comply with IRS Revenue Procedure 96-60.**

Nothing contained in this Agreement shall be construed as creating any rights in third parties, including without limitation, any employee or former employee of TESS, and no third party beneficiary rights are created or intended to be created by this Agreement.

18. SIGNATURES,

The individuals whose signatures appear below hereby certify that they are authorized to sign on behalf of their respective Parties to this Agreement.

This Agreement is effective as of the date that it is executed by all of the Parties: provided however, that no assignment or transfer of any matter covered by this Agreement shall occur until the Transition Date.

So AGREED:

TO: Members of the Licensing Support Network Advisory Review Panel

FROM: Daniel J. Graser (RA)
LSN Administrator

RE: LSN Guideline on Access Control Prior to Initial Certification

A new LSN Guideline 23, Access Control Prior to Initial Certification, has been developed and is being transmitted to you via this letter.

Given the expected large volume of some document collections, the operational capabilities of the NRC LSN system may require an extended period of time in advance of the intended date of certification of document availability in order to index/load participant documents so that they will be fully accessible to the public, parties, and potential parties by the certification date. If a participant requests, documents loaded onto the participant's LSN website for the purpose of being indexed/loaded into the central LSN site need not be made available to the public or to any other party or potential participant until such time as the participant provides its certification of documentary material availability in compliance with 10 C.F.R. §2.1003(a), or at any earlier date that the participant may specify. The new guideline has been developed to document the responsibilities and process of access control to participant documents prior to initial certification.

The guideline as presented represents technical and procedural methods that are currently implementable and immediately available to any participant electing to pursue this alternative. Further input from the LSNARP membership regarding the new guideline is requested on or before Friday, March 19, 2004, and will be documented and added to the guideline, as appropriate, insofar as it is within NRC's technical, regulatory, and legal ability to do so. This guideline in no way affects or supersedes or otherwise relieves a participant from compliance with the Commission's Rules of Practice in 10 C.F.R. Part 2.

As a result of the above new guideline, the Table of Contents and Appendix A, Acronyms, were revised.

Please delete or remove the current Cover and Table of Contents and Appendix A, replace them with the attached revisions, and add the new guideline. The online guidelines posted on the LSN web site will be revised accordingly.

23 ACCESS CONTROL PRIOR TO INITIAL CERTIFICATION

23.1 Requesting Access Control

If a participant requests, documents loaded onto the participant's LSN website for the purpose of being indexed/loaded into the central LSN site need not be made available to the public or to any potential participant until the participant provides its initial certification of documentary material availability in accordance with 10 C.F.R. § 2.1003(a), or at any earlier date that the participant may specify.

The existing provisions of 10 C.F.R. Part 2, Subpart J regarding initiation of the HLW proceeding and attendant NRC procedural rules are not affected by a participant request for access control prior to section 2.1003(a) initial certification or by a participant providing documents for LSN indexing/loading in accord with such a request.

23.2 Estimate of Participant Document Collection Size

At the same time a participant provides its request for access control prior to section 2.1003(a) initial certification, it should also furnish a current estimate regarding 1) the existing size of the participant HLW document collection that will be loaded onto the participant's LSN site; and 2) a projected schedule for making those documents available for indexing. This information will be used to coordinate projected schedules for performing indexing operations. In formulating its response relative to an indexing schedule, the participant should anticipate that the current LSN indexing capacity is approximately 150,000 documents per week.

23.3 Ownership of Information

Participant documents provided for LSN indexing/loading are not considered to be records in the possession or control of the NRC such that the NRC would consider them responsive to a Freedom of Information Act (FOIA) request directed to the NRC (54 Fed. Reg. 14925, 14936 (Apr. 14, 1989)). Rather, any such FOIA request would be referred to the participant for its direct response to the requester.

23.4 Responsibilities for Access Control

The NRC and a participant have joint responsibility for preventing unauthorized access to participant documents provided for indexing/loading into the LSN pursuant to a participant's request for access control prior to section 2.1003(a) initial certification.

23.4.1 NRC Responsibilities for Access Control

Appropriate measures will be taken by the LSN staff to ensure that any documentary material made available for indexing/loading pursuant to a participant request for access control prior to section 2.1003(a) initial certification, including restricting access to the documents to only those LSN staff members directly involved with the maintenance of the LSN.

In preserving this information, the LSN staff will use the same standard of care it uses to secure and safeguard its own confidential information of similar importance, but in no event with less than reasonable care by means that will include, but are not limited to, the following: 1) because participant documentary material is captured only in index form in Autonomy's contextual constructs and resides only in the LSN electronic repository on servers, no hard copy versions of the documentary material can or will be made and no digital copy of the documentary material can or will be retained; 2) the facility hosting the LSN meets the Government Information Security Reform Act (GISRA) and NRC requirements for system security; and 3) remote access to system administration routines can be obtained only by use of a CD containing a software module key that is accessible only by LSN staff, thereby preventing unauthorized access.

Documentary materials provided for indexing/loading into the LSN pursuant to a request for access control prior to section 2.1003(a) initial certification will not be accessible to any user other than the LSN staff. Using administrative tools provided by the LSN's Autonomy COTS search engine package, any LSN repository of indexed documentary material that has been provided to the LSN pursuant to a participant request for access control prior to section 2.1003(a) initial certification will not be available to other system users, including the submitting organization, for searching via the LSN.

23.4.2 Participant Responsibilities for Access Control

As an additional coincident measure to prevent inadvertent early release, a participant requesting LSN access control prior to section 2.1003(a) initial certification should block access from its web server (HTTP) by disabling the normal access path for public users (e.g., Port 80). To ensure there are no technical issues, a participant should advise the LSNA in advance when this measure is implemented.

23.4.3 Mutual Testing

The technical staff of a participant that requests LSN access control prior to section 2.1003(a) initial certification will be provided access to the LSN system to verify via system testing that the joint actions of the LSN staff and the participant has resulted in its documents not being publicly accessible.

23.5 Deleting Documents Prior to Public Access

Prior to section 2.1003(a) initial certification, a participant can delete previously indexed information that it later determines is not relevant, but a register of LSN accession numbers initially assigned to each subsequently withdrawn item will be maintained on the LSN website consistent with Guideline 14. Likewise, a participant can change the manner in which information is disclosed if it decides the information is privileged or otherwise sensitive (i.e., substitute a header indicating a privilege claim for the header and the full-text of the document). In this regard, however, the participant is advised that the LSN spidering process is not instantaneous nor can it handle an unlimited volume of changes in any particular day (i.e., as the spider recrawls the existing collection checking for changes or deletions, any reindexing it must do will not be reflected

until it has completed all indexing for that load, including any new documents). Therefore, it is possible that some information that the participant intends should be withheld could be inadvertently released if the deletions/changes are not implemented sufficiently before the initial certification. To avoid this problem, the participant must plan for and make deletions/changes far enough in advance of its section 2.1003(a) initial certification to ensure those deletions/changes are reflected in the LSN material that is available when the collection is made accessible to the public.

OVERNIGHT MAIL

Mr. Daniel J. Graser
 Licensing Support Network Administrator
 Atomic Safety and Licensing Board Panel
 U.S. Nuclear Regulatory Commission
 Washington, D.C. 20555-0001

Subject: Participant Request for Licensing Support Network (LSN) Access Control
 Prior to Initial Certification

Dear Mr. Graser:

As provided in Chapter 23 of the April 2004 Licensing Support Guidelines (Access Control Guidelines), the U.S. Department of Energy (DOE) submits this request for access control prior to its initial certification under 10 CFR 2.1003(a). **As** requested in the Access Control Guidelines, DOE provides the following information:

DOE currently estimates that the size of its document collection to be made available at the time of its initial certification is approximately one million documents consisting of approximately 12 million pages. DOE expects to begin populating its participant website with these documents on or about May 5, 2004, with weekly feeds thereafter. The feed for the initial, **as** well as subsequent weeks will approximate 150,000 documents, which we understand is the current weekly capacity of the U.S. Nuclear Regulatory Commission (NRC) technical staff to crawl documents for the LSN. **An** exact schedule will be determined after consultation between the DOE and the **NRC** technical staff to ensure that operational and technical factors are considered.

DOE requests acknowledgement **from** the **NRC** that DOE will be provided access control pursuant to Access Control Guidelines for the documents that DOE populates on its **participant** website prior to its initial Certification. Additionally, DOE understands the Access Control Guidelines to mean (i) that the documents DOE populates on its participant website will not be in any way released to the web, identified in response to web queries, or otherwise disclosed by the NRC before DOE makes its initial certification per 10 CFR 2.1003(a); (ii) that DOE can recall documents for any reason prior to its initial certification; and (iii) that DOE does not waive any privileges by providing documents to the NRC technical staff for crawling pursuant to the Access Control Guidelines. DOE requests NRC's confirmation that this understanding of the Access Control Guidelines is correct.

Mr. Daniel J. Graser

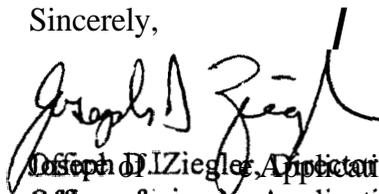

-2-

MAY 04 2004

In consideration of DOE's desire to begin populating its participant website this week as early as Wednesday, May 5, 2004, DOE requests by May 5, 2004, NRC's acknowledgement that it will be providing access control and confirmation that DOE's understanding of the Access Control Guidelines on the three points referenced above is correct.

If you have any questions, please contact Harry E. Leake at (702) 794-1457 or e-mail at harry-leake@ymp.gov.

Sincerely,

Joseph D. Ziegler, Application and Strategy

Subject: LSN Access Controls Prior to Initial Certification

Relative to your May 4, 2004 access control request, as that memorandum suggests, Licensing Support Network (LSN) access to Department of Energy (DOE) documents would be provided in accord with the LSN Guideline No. 23, Access Control Guideline. In this regard:

1. Relative to the release, identification, or other disclosure of DOE documents made available for indexing prior to DOE making an initial certification pursuant to 10 C.F.R. §§ 2.1003(a), 2.1009(b), in accord with Guideline 23.4.1, LSN staff will take appropriate measures to ensure that material made available for indexing/loading into the LSN is restricted only to those LSN project staff members directly involved with LSN maintenance.
2. Relative to the ability of DOE to recall documents prior to its initial certification, in accord with Guideline 23.5, prior to its initial certification DOE may delete previously indexed information that it later determines is not relevant or may change the manner in which the information is disclosed if it decides the information is privileged or otherwise sensitive.
3. In accord with 10 C.F.R. § 2.1006(a), traditional discovery privileges recognized in NRC adjudicatory proceedings and the exceptions from disclosure in 10 C.F.R. § 2.390 are applicable to documents provided to the LSN for indexing.

Thank you for providing information regarding the size of the initial collection DOE intends to make available at the time of its initial certification. Please do not hesitate to contact me at (301)415-7401 if I can be of further assistance.

Sincerely,

\RA\

Daniel J. Graser
Licensing Support Network Administrator

JUL 02 2004

Mr. Daniel J. Graser
Licensing Support Network Administrator
Atomic Safety and Licensing Board Panel
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852-2738

Dear Mr. Graser:

This is in response to your letter of July 2, 2004. As I believe you know from Harry E. Leake, the Department of Energy (DOE) took its LSN website off-line yesterday afternoon because of a technical problem that occurred after DOE's initial certification. This error inadvertently made available on the website the text and image of a number of documents that contain privacy protected information of project personnel, such as social security numbers, that were to be produced in "header" format only. DOE took its website off-line in order to safeguard this information.

DOE is working to restore its website as quickly as possible. However, DOE does not want to prematurely restore its website without taking reasonable measures to safeguard this information. DOE also does not want this information accessible through the U.S. Nuclear Regulatory Commission (NRC) website. As part of DOE's analysis, we now have reason to believe that the NRC index contains additional documents that contain privacy information in the text.

Accordingly, DOE requests the NRC to defer activating its index of DOE's documents until it has verified that its website will not make available the documents that may contain privacy protected information. We are working as expeditiously as possible to correct the problem. Harry Leake, as always, is available to work with you and your staff as much as possible to coordinate this activity.

Thank you for your consideration of this request.

Sincerely,

A handwritten signature in black ink, appearing to read "W. John Arthur, III".

W. John Arthur, III
Deputy Director

Exhibit 20

**DEN'S RESPONSE TO DOCUMENTS IDENTIFIED
IN EXHIBIT NO. 7 TO NEV'S MOTION TO STRIKE**

| Doc. # | DEN LSN Accession No. | Title | Explanation |
|--------|-----------------------|--|--|
| 1. | MCOI | Analysis for Yucca Mountain, Nevada," June 1996. | <p>As an initial matter, the main body of this document along with 3 (A-C) of its 8 (A-H) appendices was publicly available on the NRC's ADAMS system (accession number ML003743285) and NRC's LSN server (accession number NRC000021970). The DEN version of this document with appendices A through H was, despite NEV's claim to the contrary, available in header-only format on the DEN participant server when NEV filed its motion. The document was in header-only format, because it was flagged by DEN's privacy and privilege screening software. As part of DEN's ongoing processes and procedures, DEN would have reviewed this document's bibliographic header-only status. In light of NEV's motion, DEN expedited its review of this document and determined that the privacy and privilege concern flagged by the screening software did not require DEN to continue withholding the full text and image of this particular document. Thus, in addition to the document's header, it is now also available in full text and image format on DEN's participant server.</p> |

| Doc. # | DEN LSN Accession No. | Title | Explanation |
|--------|--|---|--|
| 2. | Not available on DEN participant server. | A., F.H.F. Leavitt, V.D.; Fickert, W. F.; and McFarlane, J. C. 1977. "Incorporation of Transuranics into Vegetable and Field Crops Grown at the Nevada Test Site." <i>Transuranics in Desert Ecosystems</i> . White, G.M.; Dunaway, P. B.; and Wireman, D.L., eds. NVO-181. Pages 1-15. Las Vegas, Nevada: U.S. Energy Research & Development Administration. | This document is readily available to Nevada and other interested persons through the Online Computer Library Center (OCLC). The accession number for this document on the OCLC is 439193. DEN therefore is not required to make this document available. See 10 C.F.R. § 2.1005(h) (exclusion of readily available documents); see also March 25, 1995 LSS ARP Transcript (Exhibit 7) at 266 (Dan Graser stated that if a "document is to be found in the OCLC or any other standard bibliographic database that you could access through an interlibrary loan, then exclude the document. If it's in OCLC then it's generally available through some sort of interlibrary loan."). |
| 3. | NNA.19870731.0041 | Baes, C. F., III; Sharp, R. D.; Sjoreen, A.I.; and Shor, R. W. 1984. A Review and Analysis of Parameters for Assessing Transport of Environmentally Released Radionuclides Through Agriculture. ORNL-5786. Oak Ridge, Tennessee. Oak Ridge National Laboratory. | This document was inadvertently deemed irrelevant due to human error during DEN's title review of documents coded as reports. A bibliographic header for this document as well as the document's full text and image are now available on DEN's participant server. DEN will conduct additional quality assurance and control reviews on its title review. |
| 4. | MOL.20021010.0291 | Bird, G. A. and Ewing, L.L. 1996, <i>Surface Water Model Simulations of the Fate of ¹⁴C Added to Lake 226, Experimental Lakes Area</i> , Technical Record TR-729. | This document is copyright protected. DEN therefore is not required to make this document available. See 10 C.F.R. § 2.1005(h) (exclusion of documents that may be subject to copyright). Nevertheless, a bibliographic header for this document was available on DEN's participant server when NEV filed its motion. |

| Doc. # | DEN LSN Accession No. | Title | Explanation |
|--------|-----------------------|---|---|
| 5. | ALH.20040618 c 48 | BIOMASS (The IAEA Programme on Biosphere Modeling and Assessment Methods) 2001TIC: 252966 | This document is a proceeding of a symposium not conducted by DEN. DEN therefore is not required to make this document available. <i>See</i> 10CFR § 2.1005(h) (exclusion of proceedings that may be subject to copyright). Nevertheless, a CD ROM containing these materials is part of the TIC database maintained by DEN's contractor, BSC. A bibliographic header for this database was available on DEN's participant server when NEV filed its motion. DEN is allowed to produce a single header for a database. 10CFR § 2.1003(a)(2). |
| 6. | MOL.2003 1029.0202 | B00000000-01717-5700-00021 REV 04 ICN 02 (Documentation of Program Change, September 2002); dpc_r402.txt. | Despite NEV's claim to the contrary, a bibliographic header of this document was available on the DEN participant server when NEV filed its motion. The document was in header-only format, because it was flagged by DEN's privacy and privilege screening software. As part of DEN's ongoing processes and procedures, DEN would have reviewed this document's bibliographic header-only status. In light of NEV's motion, DEN expedited its review of this document and determined that the privacy concern flagged by the screening software did not require DEN to continue withholding the full text and image of this particular document. Thus, in addition to the document's header, it is now also available in full text and image format on DEN's participant server. |

| Doc. # | DEN LSN Accession No. | Title | Explanation |
|--------|--|--|---|
| 7. | Not available on DEN participant server. | E-mail from Zell Peterman (DEN) to William Boyle (DEN) dated May 5, 2000, subject: C1-36 Validation Project. | This email comes from OCRWM's email system. As described in DEN's June 30 Initial Certification Plan, DEN's active users reviewed their emails from back-up tapes for potential relevance. In the case of this specific email, the author did not identify it as potentially relevant. As a result, DEN and CACI did not process it for production on DEN's participant server. DEN will, however, make this email electronically available on DEN's participant server. |
| 8. | Not available on DEN participant server. | E-mail from Zell Peterman to William Boyle, dated July 23, 2001, subject C1-36. | Same as No. 7. |
| 9. | ALP.20040612.8159 | E-mail from Mark Tynan (DEN) to Richard Quittmeyer (DEN) and Daniel Soeder (DEN) dated June 6, 1996, subject: Long Range Plan. | Despite NEV's claim to the contrary, a bibliographic header of this document was available on the DEN participant server when NEV filed its motion. The document was in header-only format, because it was flagged by DEN's privacy and privilege screening software. As part of DEN's ongoing processes and procedures, DEN would have reviewed this document's bibliographic header-only status. In light of NEV's motion, DEN expedited its review of this document and determined that the privacy concern flagged by the screening software did not require DEN to continue withholding the full text and image of this particular document. Thus, in addition to the document's header, it is now also available in full text and image format on DEN's participant server. |
| 10. | Not available on DEN participant server. | E-mail from Warren Day to Mark Tynan (DEN) dated September 11, 1997, subject: Where are we?..... | This email was authored by an inactive user and might reside on OCRWM's archival back-up tape emails. As described in DEN's June 30 Initial Certification Plan, however, only current OCRWM users reviewed their email for potential relevance and so DEN made available only that subset of emails. DEN will make this email electronically available on DEN's |

| Doc. # | DEN LSN Accession No. | Title | Explanation |
|--------|-----------------------|---|--|
| 11. | 2LP.20040612.8586 | E-mail from Dwight Hoxie (DEN) to Roger Henning (DEN) et al., dated September 15, 1998, subject: Infiltration maps and data.... | <p>participant server.</p> <p>This email is contained within a string of emails. Despite NEV's claim to the contrary, a bibliographic header for this e-mail string was available on the DEN participant server when NEV filed its motion. The document was in header-only format, because it was flagged by DEN's privacy and privilege screening software. As part of DEN's ongoing processes and procedures, DEN would have reviewed this document's bibliographic header-only status. In light of NEV's motion, DEN expedited its review of this document and determined that the privacy concern flagged by the screening software did not require DEN to continue withholding the full text and image of this particular document. Thus, in addition to the document's header, it is now also available in full text and image format on DEN's participant server.</p> |
| 12. | ALP.20040612.8 129 | E-mail from Mark Tynan (DEN) to Cady Johnson dated June 14, 1996, subject: SRO Weekly Report | <p>Despite NEV's claim to the contrary, a bibliographic header of this document was available on the DEN participant server when NEV filed its motion. The document was in header-only format, because it was flagged by DEN's privacy and privilege screening software. As part of DEN's ongoing processes and procedures, DEN would have reviewed this document's bibliographic header-only status. In light of NEV's motion, DEN expedited its review of this document and determined that the privacy and privilege concern flagged by the screening software did not require DEN to continue withholding the full text and image of this particular document. Thus, in addition to the document's header, it is now also available in full text and image format on DEN's participant server.</p> |
