**SUBJECT: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Response to Request for Additional Information Re: Training and
Qualification Plan (TAC No. MC2921)**

References: 1) Entergy Operations, Inc. letter to USNRC (JAFP-04-0062) dated April 29, 2004 regarding Supplemental Response to Issuance of Orders to Modify License for Revised Design Basis Threat and Compensatory Measures Related to Security Force Training and Fitness for Duty
2) USNRC letter, R. Fretz to T. Sullivan, dated July 9, 2004 regarding James A. FitzPatrick Nuclear Power Plant – Request for Additional Information Re: Training and Qualification Plan (TAC No. MC2921)

Dear Sir or Madam;

Entergy Nuclear Operations, Inc., (ENO), James A. FitzPatrick (JAF) Nuclear Power Plant is in receipt of your request for additional information (RAIs) (Reference 2). In order to standardize our approach with the NRC-approved industry approach, JAF's April 29, 2004 response to Order EA-03-086 (Reference 1) was strictly based on NEI-03-12, "Template for the Security Plan, Training and Qualification Plan, Safeguards Contingency Plan" Revision 1, as approved by the staff in a letter from Roy P. Zimmerman to Steven D. Floyd dated June 10, 2004.

The NRC RAIs either request modifications to the template language, to licensee-provided details (i.e., bracketed template information) or requests additional detail for understanding without a corresponding modification of the plan. Where template language is involved, ENO will be adopting revised language once agreement has been reached between the industry Security Working Group (SWG) licensee representatives and the staff. Entergy is an active member of the SWG licensee representatives that will meet with the staff for this purpose. We believe this approach will be the most responsive and will maintain mutually desired consistency. For selected RAIs, ENO intends to adopt the language that is deemed acceptable to the Commission and responsive to the NRC issues following the industry security frequently asked question (SFAQ) process and the final disposition of any industry appeals. Responses that rely on this process are discussed in the specific RAI responses. We believe that sufficient detail is provided here to enable the staff to conclude the issue can be appropriately resolved subject to SWG and NRC staff agreements and later submittal of changed pages incorporating known acceptable language (i.e., a revision of the Security Plan that incorporates all responses). ENO proposes to provide revised Security Plans or replacement pages for each site that incorporate all of our RAI responses on a schedule to be determined with the staff.
