Rick,
Yes. All Entergy sites are going this direction. There may be one letter for all of Entergy or two separate letters (one for South and one for North). No firm schedule yet, but I'd guess this summer.

Subject: Use of Encyption Software

Ronda,

The NRC Project Managers have been asked to check with their licensees if they plan to submit requests for approval to transmit safeguards information using encryption and decryption software pursuant to 10 CFR 73.21(g)(3). If so, when do you expect to submit the request? See ADAMS Accession nos. ML041310099, ML041310241, ML041320207 for examples.

Thanks,

Rick
