Mailstop T-6D, U.S. Nuclear Regulatory Commission
Washington, D.C., 20555-0001

Dear Nuclear Regulatory Commission Members:

On behalf of Humana Inc., I am writing to encourage you to renew Point Beach's Unit One and Two licenses so Wisconsin residents and businesses can benefit from 20 more years of clean, efficient and affordable nuclear power.

While the Point Beach facility employs approximately 730 area residents directly with family-sustaining jobs, clean, reliable, and efficient energy is critical to many businesses affecting many thousands of jobs. It's 20-year record of safe operations warrants license renewal. And its significant contribution to Wisconsin's energy generation is priceless to the economic development of our region and quality of life of our residents.

Approval of this application is one way we can ensure Wisconsin residents are not faced with an unnecessary energy shortage, and that Wisconsin's economic recovery is not curtailed. For this reason, I ask that you grant approval for Point Beach's application for license renewal.

Sincerely,

George P. Brown
Regional Director
