## PERSONAL COMMUNICATION NOTES

DATE: 3 / 8 / 2004 TIME: 2 pm PROJECT TITLE: LES EIS for NMBETWEEN: Ron A. Bousleman, City Manager OF: Eunice City GovernmentLOCATION: Eunice, NM TELEPHONE No.: (505) 394-2576BY: Milton Gorden of ATL Team (the caller) TELEPHONE No.: (301) 515-6781DISCUSSION:

Mr. Bousleman was contacted to determine if the city of Eunice had information regarding water utilities information for Eunice and Hobbs, NM. The information requested included capacity and usage rates, and water quality. It was also requested if it was known how long the water pipeline to the LES NEF site would be. It was agreed with Mr. Bousleman that should send him an e-mail delineating the information we would like to obtain. He could not promise that they could supply all of the information but they would try to get back to me in a couple of days. His e-mail address is rbousleman@leaco.net.

Mr. Bousleman subsequently responded to two emails. Electronic communications are attached.

 Subject: Re: Data for LES Environmental Impact Statement

Milton:

LES has indicated to us that their water use will be 75 acre ft or 66,971 gpd.

I foresee no masurable impact on the City's water system with the estimated daily needs of LES for their plant.

Thank you for the below information. Two more questions:

- 1) How many MGD has LES told you they will need?
- 2) Will LES' water needs impact your operations at all (e.g., will you need to change how you allocate water, add additional wells to maintain a certain amount of excess capacity, add any additional equipment other than the piping to the site, etc.)?

 Subject: Re: Data for LES Environmental Impact Statement

Mr. Gordon:

Sorry for the delay.

Number of wells--

Six (6) all from the Ogallala

Capacity--

5.5 MGD

Actual current --

1.1 MGD

Water quality--

High quality, no contaminates, requiering only disinfection prior to delivery

Length of pipeline needed--

Approximately five(5) miles

If you need additional information, contact me.

Subject: Data for LES Environmental Impact Statement

Per our telephone conversation this afternoon, we are trying to obtain information regarding the Eunice and Hobbs municipal water supply systems to include in the EIS we are drafting for the U.S. NRC so that we can effectively determine impacts of the proposed LES facility.

We would like to obtain the following information:

Number of wells and source (I assume the Ogallala)  
Capacity (such as gpd)  
Actual current use (gpd)  
Any water quality data regarding the drinking water  
Length of pipeline needed to transfer water from Eunice and Hobbs

If you have any questions, let me know. Also, for my records, could you include your full name, title and address in your email response? We have to document everyone we contact to include in the EIS. Thanks.

*Sincerely,*

*Milton Gordon*
