**Subject:** Nebraska Public Power District Response to Request for Additional Information

**Reference:** U.S. Nuclear Regulatory Commission letter dated July 23, 2004, to Mr. Randall K. Edington, Nebraska Public Power District, "Cooper Nuclear Station - Request for Additional Information, RE: Safeguards Contingency Plan and Section 9.4.1 of the Physical Security Plan (TAC No. MC2908)

The purpose of this letter is to respond to your request for additional information (RAI) as outlined in the above referenced letter. In order to standardize our approach with the industry approach, Nebraska Public Power District's (NPPD) April 29, 2004, response to Order EA-03-086 was based on Nuclear Energy Institute (NEI) 03-12, "Template for the Security Plan, Training and Qualification Plan, Safeguards Contingency Plan." The questions either request modification to the template language or to licensee provided details. Where template language is involved, NPPD will be adopting revised language that has been agreed to between the industry Security Working Group representatives and the Nuclear Regulatory Commission (NRC). Where agreement has not been achieved as of the writing of this response, NPPD intends to adopt the language that is deemed acceptable to the NRC and responsive to the NRC issues following the NEI Security Frequently Asked Questions (SFAQ) process and the final results of any industry appeals. Responses that rely on this process are discussed in the specific question responses. Sufficient detail is provided here to enable the NRC to conclude the issue can be appropriately resolved pending later submittal of changed pages (i.e., a revision of the Security Plan that incorporates all responses) following the receipt of the final set of RAIs.
