Ron:

As discussed with you this morning, SNL will address results of the analyses performed for all casks and radioactive waste packages and draw appropriate conclusions. Thanks.

Mahendra

Mahendra - As I recall, the last time that NEI presented their plane scenerio it was for a SF transportation cask on 3/5/02. Hopefully the UMS transportation cask will also be addressed by SNL as part of the "behavior of the other casks for other laods, by September 6th" that you mentioned in your e-mail.

I am forwarding the memo to SNL from Boeing regarding the status of the contract. It appears that the contract may be signed by this Thursday. Based on his, the meeting with the Boeing and SNL may be set up by Mid September.

With respect to Marty Virgilio's memo regarding supporting the RES on Q&A's for 9/11, I also talked to Jeremy and Ken today to determine if SNL could make preliminary conclusions regarding the HI-STORM cask behavior and safety for the aircraft impact, and the behavior of the other casks for other laods, by September 6th. This information would be useful in preparing Q&As for ISFSIs, by September 11th. Ken agreed that SNL would provide the information by September 6th. The SNL report to be provided by September 30th, would have similar conclusions with supporting details.

Thanks.

Mahendra
