Subject: Another comment: NRC and louisiana energy services in Lea county, new mexico

>>> "PHILLIP BARR" <pharb2@msn.com> 08/04/04 09:45AM >>>

Something occurred to me about the NRC. If they truly are an ethical agency of the government, why didn't they tell the people in Lea county (or the state for that matter) that there were two planned (waste control) nuclear waste dumps for Andrews county, (across the line from the planned LES site.)

Makes you wonder if the NRC mentioned LES to the people of Andrews county?

Now I asked the LES rep. recently in case of nuclear waste pollution in the water table, how it could be determined which company would be responsible? Les or Waste control.....

I believe the mans name was ferlund. His answer was "our stuff is different than their stuff."

Isnt that reassuring?

I hope Texas is watching this.

Phillip Barr
Lea county, new mexico
