Subject: Seismic RAI Topics for Mtg discussion

Mike,

Please send this on to Eddie Grant at eddie.grant@exeloncorp.com

Nan asked me to forward onto you some topics for next weeks seismic audit on the 18th and 19th. We have a batch of RAIs but it doesn't look like they are going to make it thru management in time for the audit. So here are the topics that we would like to focus on

- 1) Update of EPRI source models for New Madrid, Wabash, and So Illinois source zone (max magnitudes, recurrence, geometry)
- 2) Survey/coverage of liquefaction features in site region
- 3) Incorporation of site geology (including uncertainties) into SSE ground motion
- 4) Bayesian estimation of max Magnitude for central Illinois background source
- 5) use of EPRI shear modulus and damping reduction curves

In addition, you already have our RAI on the Performance-Based approach.

Thanks,

Cliff Munson
