**VIRGINIA ELECTRIC AND POWER COMPANY (DOMINION)**  
**SURRY POWER STATION UNITS 1 AND 2**  
**NORTH ANNA POWER STATION UNITS 1 AND 2**  
**OPERATIONAL QUALITY ASSURANCE PROGRAM**  
**INSPECTION PROGRAM CHANGES AND CLARIFICATIONS**  
**WITHDRAWAL OF CHANGE REQUEST**

In a letter (Serial No. 02-735) dated February 27, 2003, Virginia Electric and Power Company (Dominion) submitted a revision to the Operational Quality Assurance Program (Topical Report) for NRC review and approval. This was supplemented in a letter (Serial No. 03-574) dated January 9, 2004, in response to a request for additional information. Subsequently, in a telephone conversation on May 18, 2004, the NRC identified concerns with the proposed change. Specifically, the NRC stated the issue of reduced holdpoints was a complicated review and that there was presently insufficient information to reach a determination of reasonable assurance using a deterministic approach.

Given the NRC concerns and Dominion's intention to transition the Topical Report to ANSI/ASME NQA-1-1994 in the near term, it is not prudent to continue activities in support of this proposed change. Therefore, Dominion hereby withdraws the proposed change request.

Should you have any questions, please contact Mr. Dave Sommers at (804) 273-2823.

Very truly yours,

E. S. Grecheck  
Vice President – Nuclear Support Services
