Subject: RE: Application TOC

Eddie - I have reviewed the draft TOC you sent me last month and compared it to the applicable review sections identified in RS-002. I had some questions regarding the differences. First, I noted that the following sections were identified in your TOC but are **not** listed as applicable ESP sections in RS-002. Can you please confirm that you do intend to submit ESP information for these sections for NRC review so that we can ensure we have review staff assigned to handle them?

Site Safety Analysis Report

2.4.8 Cooling Water Canals and Reservoirs

2.4.10 Flooding Protection Requirements

2.4.14 Technical Specification and Emergency Operation Requirements

2.5.6 Embankments and Dams

Also, the following sections appeared to be missing from your draft TOC for the SSAR:

3.5.1.6, Aircraft Hazards

13.6 Physical Security

These items need to be addressed in your application. For security, the application needs to address the items identified in the NRC's May 6, 2003 letter to Exelon on this subject. Please let me if Exelon plans to address these items.

Nan

Attached is the informal copy of the Application Table of Contents as you requested. Note that it indicates draft and may change slightly but nothing major is anticipated. I would also note that the format may differ slightly from Entergy and Dominion but we have attempted to be consistent, and the content will be generally the same.

<<Microsoft Word - Exelon ESP ToC 20030701.pdf>>

Bill Maher tells me he got a similar request from Tom Kenyon so he is on cc.

Have a great weekend!

Eddie - Another request - is it possible to get an informal copy of the application Table of Contents? This will help us prepare for the application by having all of the application sections assigned to the appropriate review branches ahead of time. It will also assist us with a crosswalk to the Review Standard and in setting up our numbering and tracking systems. Thanks.

Nan
