Subject: Information on Clinton Lake

Craig - I'm not sure if you recall but I am the NRC's Project Manager for Exelon's ESP application for the Clinton site. We have gotten a number of inquiries from members of the public regarding the ESP project. One of the latest inquiries expresses concern over the possibility of security concerns requiring the closure of Clinton Lake, a concern you've no doubt heard before. Could you please provide me some information about the lake to assist in answering this inquiry? Specifically, does AmerGen own the lake? If so, are there any agreements with Local, State, or Federal agencies concerning the use and care of the lake? When the lake was closed after Sept. 11, 2001, who required the closure? Any information you can provide on these issues will assist us in providing accurate responses when they come up. Thanks for your help.

Nan Gilles
Senior Project Manager
