RE: Revised LSN Guideline

On July 21, 2004 I circulated a draft revision to LSN Guideline 14, Bibliographic Treatment of Changed Documents and Use of Cross References to Identify Document Relationships with a request for comments by August 6, 2004. No comments were subsequently received and Guideline 14 has therefore been revised to reflect a change in the individual responsible for approving deletions of material already made available via the LSN. The revised document and the Table of Contents are being transmitted to you via this letter. A change (addition or deletion) from the prior version of a guideline is identified by redline.

The LSN guidelines in no way affect or supersede or otherwise relieve a participant from compliance with the Commission's Rules of Practice in 10 C.F.R. Part 2. They document the decisions reached by the LSNARP and the implementation of the LSN technical solution.

Input from the LSNARP regarding the revisions to guidelines is encouraged and will be documented and added to the guidelines, as appropriate.

Please delete or remove the current Cover and Table of Contents and Guideline 14, and replace them with the attached revisions. The online guidelines posted on the LSN web site will be revised accordingly.
