etb

Beth;
I have created a profile for you in SOMS. Your login and password is [REDACTED] I recommend that you change your password the first chance you log in by selecting "options" and then "change your password". The only limitation is that the password must start and end with a letter.

Neal

Subject: eSoms training

Neal & Derek,

I plan to observe the ops closeout inspection of the torus. John Boothroyd thought I'd need to be able to sign onto the tagout in order to do this. (Is this correct?)

As such, I have completed the eSoms CBT. John Taylor said I should contact you to now allow me to use the system. Note: I currently do not have a username or password for the system. Do you take care of that, too?

Thanks for your help with this!
