MEMORANDUM TO: B. Jennifer Davis, Chief  
Environmental and Low-Level Waste Section  
Environmental and Performance Assessment Directorate  
Division of Waste Management and  
Environmental Protection  
Office of Nuclear Material Safety  
and Safeguards

FROM: Robert A. Nelson, Chief **/RA/**  
Uranium Processing Section  
Fuel Cycle Facilities Branch  
Division of Fuel Cycle Safety  
and Safeguards  
Office of Nuclear Material Safety  
and Safeguards

SUBJECT: SUPPORT PROVIDED BY RON C. LINTON

Mr. Ron Linton of your staff has recently provided technical support for our initiative to defer active ground-water regulation at *in situ* leach (ISL) uranium extraction facilities to the States of Nebraska and Wyoming. Mr. Linton has assisted in the review of these States' underground injection control programs to determine the comparability of these programs with the U.S. Nuclear Regulatory Commission's ground-water protection requirements for ISLs. Mr. Linton's thorough knowledge of the Agency's related regulations and his technical expertise have been instrumental in completing these reviews. We deeply appreciate the support that he has provided.
