**Request for Review and Approval of ANF-1358(P) Revision 3, "The Loss of Feedwater Heating Transient in Boiling Water Reactors"**

Ref.: 1. ANF-1358(P)(A) Revision 1, "The Loss of Feedwater Heating Transient in Boiling Water Reactors," September 1992.

Framatome ANP requests the NRC's review and approval of a revision to the topical report ANF-1358(P)(A), "The Loss of Feedwater Heating Transient in Boiling Water Reactors," Reference 1. The methodology in Reference 1 defines the minimum critical power ratio (MCPR) following a Loss of feedwater heater event as a function of the MCPR prior to the event and various plant parameters.

The revision is based on an expanded database and results in minor changes to the coefficients of the previously approved correlation. The purpose of expanding the database is to extend the range of applicability of the methodology so that it can be applied to current core designs. The revision also extends the methodology to the determination of the linear heat generation rate.

Framatome ANP would appreciate the NRC approval of this revised topical report by September 1, 2005.

Framatome ANP considers some of the material contained in the enclosed documents to be proprietary. As required by 10 CFR 2.390(b), an affidavit is enclosed to support the withholding of the information from public disclosure.

Very truly yours,

James F. Mallay, Director  
Regulatory Affairs

Enclosures

CITY OF LYNCHBURG        )

1.       My name is James F. Mallay. I am Director, Regulatory Affairs, for Framatome ANP ("FANP"), and as such I am authorized to execute this Affidavit.

2.       I am familiar with the criteria applied by FANP to determine whether certain FANP information is proprietary. I am familiar with the policies established by FANP to ensure the proper application of these criteria.

3.       I am familiar with the FANP information contained in topical report ANF-1358(P), Revision 3 referred to herein as "Document." Information contained in this Document has been classified by FANP as proprietary in accordance with the policies established by FANP for the control and protection of proprietary and confidential information.

4.       This Document contains information of a proprietary and confidential nature and is of the type customarily held in confidence by FANP and not made available to the public. Based on my experience, I am aware that other companies regard information of the kind contained in this Document as proprietary and confidential.

5.       This Document has been made available to the U.S. Nuclear Regulatory Commission in confidence with the request that the information contained in this Document be withheld from public disclosure.

6. The following criteria are customarily applied by FANP to determine whether information should be classified as proprietary:

- (a) The information reveals details of FANP's research and development plans and programs or their results.
- (b) Use of the information by a competitor would permit the competitor to significantly reduce its expenditures, in time or resources, to design, produce, or market a similar product or service.
- (c) The information includes test data or analytical techniques concerning a process, methodology, or component, the application of which results in a competitive advantage for FANP.
- (d) The information reveals certain distinguishing aspects of a process, methodology, or component, the exclusive use of which provides a competitive advantage for FANP in product optimization or marketability.
- (e) The information is vital to a competitive advantage held by FANP, would be helpful to competitors to FANP, and would likely cause substantial harm to the competitive position of FANP.

7. In accordance with FANP's policies governing the protection and control of information, proprietary information contained in this Document has been made available, on a limited basis, to others outside FANP only as required and under suitable agreement providing for nondisclosure and limited use of the information.

8. FANP policy requires that proprietary information be kept in a secured file or area and distributed on a need-to-know basis.

9. The foregoing statements are true and correct to the best of my knowledge, information, and belief.
