Subject: NRCDOSE Update

Amanda and Eva -

Val Malafeew with Chesapeake Nuclear Services provided me with new executable files for GASPAR and LADTAP. This is version 2.3.5 of NRCDOSE - I'll not sure why the Oak Ridge code center is distributing version 2.3.2.

I've attached the files - just replace the existing files with the corresponding attached files.

I did a quick test using GASPAR and this appears to have corrected the problem we were having with entering the population data.

Let me know if you have any questions.

Thanks,

Greg
